TRADITIONS OF TOMORROW

Anyone who hunts must be able to rely on their equipment with the highest level of confidence. Whether out stalking in familiar territory or on a long-planned hunting trip abroad, a reliably functioning hunting rifle is indispensable. The traditional rifle of the past has experienced many improvements in recent years. Innovations that were initially passed off with a smile, have now become self-evident standards. True to our slogan, we are creating the „Traditions of Tomorrow“. With this ideal in mind, we, here at Blaser have been working for more than 60 years to make your hunt successful. Without compromise.

Many hunters describe the R8 Silence and the integrated titanium silencer as „the best straight-pull action rifle in the world!“ This is a great endorsement and it inspires us to expand our technological market leadership into other areas of hunting equipment. Therefore, we are now very proud to present our latest innovation from Blaser:

BLASER HUNTEC!

This revolutionary clothing line from Blaser Outfits is characterized by the same features that make the R8 so successful: modularity, versatility, reliability, and high-performance. Absolute freedom of movement in every situation. Extremely breathable, well-thought-out details for hunting, including a completely new developed camo that will set the standards for modern hunting clothing. The perfect gear for our passionate customers in the most demanding hunting terrain!

As hunters we are closely connected with nature and that is why we bear a special responsibility for our game. These wild animals are unfortunately becoming a political pawn and are in need of our protection more than ever! That is why we have launched the „Blaser Fawn Savers“ project as a part of our sustainability strategy.

We provide drones on a loan agreement throughout Germany to save fawns and other wild animals from a cruel death during the mowing period. Year after year, we will continue to expand this commitment together. Additionally, Blaser has been operating at a climate-neutral level since April of 2021.

These are just but two examples of how we assume responsibility for nature and will help to preserve our environment for future generations. For us, economic activity and social responsibility go hand in hand. Just like hunting and conservation.

I hope you will be just as enthusiastic about our products as we are and find everything for your hunting needs on the following pages!

Yours sincerely,

Wiebke Lücke
Head of Blaser Marketing

OUR PASSION: THE HUNT

Born Out of Passion

Hunting may be one of mankind's most fundamental instincts, but in a modern world, we hunters must constantly adapt to new challenges. This is only possible through innovation and the people who drive this with passion.

From Partnership

As a leading innovator, we are the driving force in the international hunting firearms industry. 60 years of experience have sharpened our senses for innovative technological advances while always remaining aware of our ethical obligations.

From Enthusiasm

Our Blaser employees share your enthusiasm for hunting and have a wide range of talents. We are proud of the diversity of personalities and skills, and the great collaboration that happens within the company to produce the finest hunting equipment.

OUR CLAIM: CREATING VALUES

Milled from Solid Blanks

The manufacture of system parts from solid blanks gives you sound quality, reliability and durability. Labor-intensive manufacturing on the most modern CNC machines provides the basis for minimum tolerances and long-lasting shooting accuracy.

From High-Quality Materials

Highly tempered steel, forged light-metal alloys and precious walnut are brought together with artistic precision to create unique, exceptional objects. Every Blaser hunting firearm is an investment for future generations.

With a Sense of Tradition

We characterize today's hunting culture with a sense of traditional craftsmanship. Highly qualified gunsmiths, stock makers and engravers make the firearm into a masterpiece that highlights the personality and passion of its owner.

OUR CONCLUSION: EVERYTHING FROM ONE SOURCE

Enthusiasm for the manufacturing of hunting firearms and the passion for hunting have shaped Blaser. Only in this way, outstanding products and perfectly aligned overall solutions were born, that are consistently extended and further developed – because successful hunting needs far more than just an excellent hunting firearm.

Valuable Hunting Optics

For us, creating the best unit of rifle and target optics has always been a matter of the heart. For our own development division in Wetzlar, we brought together the best of their trade. The result is hunting optics, that are unparalleled. This is exactly as riflescopes and binoculars should be in order to satisfy our customers.

Aligned Equipment

Everything from one source also means for us: high-performance rifle ammunition, essential equipment that is indispensable for hunting and premium wear that is made for active hunting.

Attractive Hunting Experiences

All over the world, Blaser also offers selected hunting trips where highly professional outfitters do everything to fulfill the high demands of our customers to ensure an unforgettable hunting experience.

OUR #blaserfamily. YOUR DIGITAL CHANNELS

Blaser is not only your analog hunting companion, but also your digital buddy. Configure the rifle of your dreams on the Blaser website. Or browse the new „Online Gun Room“, where we have selected exquisite Blaser custom rifles for you. Go on an online expedition and experience the world of Blaser digitally!

INSTAGRAM

Over 84,000 hunters follow our Instagram account, on which we post every day. Please share your best Blaser moments with the hashtag #blaserfamily.

MADE FOR PROS

Countless hunting guides from all over the world carry a Blaser by conviction. Only when the going gets tough, does it become evident that a rifle is both reliable and accurate. It is through the experiences of professional hunters that has helped Blaser sporting arms acquire their legendary reputation globally.

“In the past, I was rather skeptical about modern hunting firearms. Today, I know how the R8 performs even under the most extreme conditions.”

As the manager of Sney Rivier Lodge in the heart of Namibia, Conway Volek has a broad responsibility. His focus is on wildlife management which – besides hunting – also comprises renaturation measures.

Many of Namibia’s visitors actually do not know the fact, that since the beginning of the 19th century a significant change of vegetation has taken place in large parts of the country. The reason for this was the more and more intense cattle ranching resulting in a strong scrub encroachment of the once open savanna. Grass reserves decreased continuously having dramatic consequences for the wildlife population – above all in years with little rain. A professional scrub clearance thus is an important factor in increasing the wildlife’s survival chances even during long dry periods.

Today, the funding of such renaturation projects is almost exclusively financed through hunting. The R8 bolt action rifles which are available at the Sney Rivier Lodge are constantly used by hunting guests while out in the field. They are made for tough use, easily resist hard knocks and thorns as well as dirt while proving their reliability and precision each and every day.

Conway Volek
Professional Hunter,
Manager Sney Rivier Lodge,
Namibia

“The correct hunting strategy needs to be decisive. It yields much more than constant hunting pressure. The R8 is the perfect rifle above all, due to its short receiver length, when using a silencer. This is the ideal combination to support me while hunting because it doesn’t interfere with the game and is entirely in line with ethical hunting.”

Professional hunter Sepp Rinner has the good fortune of being able to work on a private estate with an owner who has a soft spot for game. Of course, profitable forestry operations also play an important role on his private lands.

Therefore, it is understandable that one is highly interested not only in a healthy forest but also in a well-considered, sustainable cultivation strategy. Nevertheless, it is even more remarkable that with expertise and foresight, this strategy has proven successful in preserving the alpine forest which offers a home to red deer, chamois and many other indigenous species. Many professional hunters, just like Sepp Rinner, have a shared passion for heritage and work to keep it protected.

Sepp Rinner
Professional Hunter,
Aschau / Chiemgau, Germany

“Steep slopes and rugged rocks, heavy snow, different altitudes and vast woodlands – hunting in the mountains is demanding. It challenges both man and his gear. For me, it is as simple as that: I can rely on my R8 in any situation.”

“You protect what you love ...” – since his childhood, the rich nature of Tyrol’s alpine region has been home and a place where he makes his livelihood for Head Professional Hunter Otto Schratz. In his daily work, he takes on a double role: As a professional hunter, he always has an eye on the game population and its regulation. At the same time, he ensures a sustainable forest management program. This not only requires a particular feeling for the sensitive balance between forest and game, but it also involves a role with us humans. For the committed hunter and game manager one thing is clear: In our cultural landscape both parts can and should only work together in harmony. Especially with regard to the year-round mass tourism in the mountains, the conservation of nature is a particular challenge and something that comes from the heart for Otto Schratz – today and into the foreseeable future.

Otto Schratz
Head Professional Hunter,
Hoefen, Austria

NEW — BLASER HUNTEC

THE ULTIMATE HUNTING CLOTHING

We have rethought hunting clothing from scratch and focused on what really counts when hunting in challenging terrain and changing weather conditions: an optimal body climate, unrestricted freedom of movement, perfect camouflage and the lowest possible weight. The essence of this is Blaser HunTec.

Experience a new dimension in hunting gear!

HUNTEC

EXTREME PERFORMANCE

HUNTEC CAMO

OUR CAMOUFLAGE SYSTEM

EXTREME PERFORMANCE

To guarantee the best performance when high demands are placed on your gear while hunting in alpine terrain – this was our goal when developing the revolutionary Blaser HunTec collection. Countless information was processed, tests performed under varied light and weather conditions in various terrains to ensure a camo clothing line that will live up to its name – designed for hunters by hunters and made by Blaser.

EVERYTHING BLASER

Everything from one source: Blaser HunTec provides you with a perfectly aligned system which consists of the Blaser R8, Blaser riflescope, Blaser HunTec clothing and Blaser camouflage accessories.

OUR HUNTING OPTICS

Some may ask themselves what was the reason for which Blaser started developing their own optical devices. Philosophically answered: The best is the enemy of the good. Constructively answered: Because there are innovative technologies today that meet our requirements when turning our knowledge into one-of-a-kind products. For our customers this means: the right Blaser binoculars for every use, the best Blaser target optic for every rifle. Going for the ideally matching hunting equipment can be that easy.

OUR PRECISION OPTICS: FOR BETTER SHOOTING

EXPERIENCE BLASER LIVE
See the video

RETICLE IN THE FIRST FOCAL PLANE: ALWAYS ACCURATE

Rifle, scope and scope mount – these are the essential pillars of shooting accuracy. No wonder then, we at Blaser do not compromise. This is also the reason for which we have developed a new generation of riflescopes and while doing so, consequently count on reticles in the first focal plane.

Only with riflescopes featuring a reticle in the first focal plane, the point of impact cannot be changed when switching magnification due to their special design. The reticle overlays the target image before the moving parts of the zoom system come into play.

Originally, reticles in the first focal plane were the benchmark with European premium riflescopes because of their more reliable construction. Only with the development of illuminated reticles for use by day many manufacturers switched their reticle to the second focal plane. The reason for this was the fact that at that time the luminous structures could not be realized fine enough in order to be integrated into the first focal plane.

Thanks to Swiss phase grating technology it was possible to design very fine reticles in the first focal plane featuring a reticle illumination that is also suitable for daylight. A benefit that we at Blaser simply had to make use of – for a constant point of impact with any magnification: The shot hits there, where it is expected!

Precise on Principle

Thanks to the reticle's position in the first focal plane, mechanical tolerances do not affect the point of impact when changing magnification.

"Hunting in the mountains is challenging. It requires a lot of experience, preparation and dedication. Out in the field my R8 and my Blaser riflescope – with reticle in the first focal plane – are the most reliable solution for any situation."

Otto Schratz

*Head Professional Hunter,
Hoefen, Austria*

SAFETY EVEN WITH LONG-DISTANCE SHOTS

Even when it is the exception rather than the rule, there are situations in which a long-range shot may become necessary. All well and good, when you are technically prepared for being able to remain on target and not having to aim higher. The Quick Distance Control (QDC) of our riflescopes was specially developed for this purpose. Their highly precise and at the same time robust mechanics provide a consistently reliable return to zero.

The Blaser riflescopes 2.8–20x50iC and 4–20x58iC come with QDC Quick Distance Control as a standard feature. Before shooting over long distances, the corresponding elevation correction of the fast reticle adjustment can be done comfortably even when already in shooting position.

A unique feature is the possibility to fix the two adjustments "zeroed" and GEE (4cm high with a rifle that is zeroed at 100m). This insures that an unintentional adjustment is not possible. Nevertheless hunters can easily make windage or elevation adjustments with just one twist of the hand, should they need. If, due to a long shooting distance, 4cm high shot at 100m should not be sufficient, the reticle elevation adjustment can be rotated further by the necessary "number of clicks". In this case, the adjustment is not locked by lowering the adjustment turret, so that its previously selected adjustments remain clearly visible and reminds you to later set back to "normal position".

THE COCKING SLIDE ACTIVATES THE ILLUMINATED DOT

Illumination Control makes this possible with all Blaser R8 and K95 rifles.*

A sensor in the riflescope recognizes the position of the cocking slide and automatically regulates the switch-on/-off function of the illuminated dot. In order to prepare for the shot one single movement is enough. The illuminated dot's intensity then always corresponds to the intensity that was adjusted last. Its adjustment is comfortably done using the turret on the scope's right. Thanks to this perfect interplay of rifle and scope you gain time and thus the necessary calmness for a safe shot.

When using Blaser riflescopes on rifles without an iC cocking slide, the illuminated dot is activated manually by pulling out the turret on the right. In order to reach the longest possible battery life, the illuminated dot automatically switches off as soon as the rifle is in a very steep to vertical or lying position. Once taking a shooting position again, the illuminated dot is automatically activated.

** All Blaser R8 models can be retrofitted with an iC cocking slide.*

AUTOMATICALLY LOCKED

The adjustment turret for parallax is automatically locked for a distance of approximately 100m. Thus, it cannot be adjusted unintentionally. Before shooting at distances greater than 100m, the adjustment turret is easily pulled out to select the desired distance.

UNMATCHED PRECISION

Since the days of William Tell, the Swiss have been recognized for their utmost precision. With the collaboration between the Swiss and Blaser a new standard of precision adds value to any hunting experience.

Thanks to innovative Swiss phase grating technology, Blaser riflescopes captivate through a low reticle sub-tension even with high magnifications.

In combination with the daylight-visible illuminated dot that is adjustable to all light conditions, nothing stands between you and your precise shot anymore.

ROBUST FOR TOUGH USE

The indestructible body of the Blaser riflescopes features a robust hard anodized coating which makes it resistant to external influences. When dealing with a drop or fall while hunting, the illumination adjustment control was purposefully built in conjunction with the parallax adjustment turret to avoid damage.

Both operating elements are made of sturdy metal. The rubber coating in handy fish-scale chequered design ensures a safe grip even in wet conditions.

INTUITIVE TARGET ACQUISITION THANKS TO INTELLIGENT VARIABLE DOT

The 1–7x28 iC is state-of-the-art level performance additionally equipped with an Intelligent Variable Dot. Rough terrain, foul weather, and high levels of stress will put even the most experienced hunter to the test. The dual output feature of the illuminated dot is just the answer you have been searching for. At low power of magnification, 4x and lower, the illuminated dot is larger in size and ideal for fast moving game providing greater situational awareness and intuitive target acquisition. The IVD's dot intensity can also be adjusted by a side mounted turret.

Above 4x magnification the dot size is automatically reduced for accurate shot placement over long distances. Precise dot resolution is essential for target identification and shot placement. The dot intensity can also be adjusted by a side mounted turret. Whether bright sun, reflective snow or deep twilight, as soon as the game comes into sight, target acquisition is intuitive.

BLASER 2.8–20x50iC THE ALL-ROUNDER

Compact performance – whether mountain hunting, stalking or sitting game, the 2.8–20x50iC captivates with compact size and range.

Compact and Powerful

20x maximum magnification and bright 50mm objective lens merge into an extremely compact construction. Thanks to the one-of-a-kind design, rifle and scope result in a harmonious overall appearance.

Magnification	2.8x – 20x
Effective lens diameter	28 mm – 50 mm (1.1" – 1.97")
Exit pupil diameter	10 mm – 2,5 mm (0.39" – 0.1")
Field of view at 100m (109 yds)	13.2 m – 1.9 m (14.4 yds – 6.5 yds)
Eye relief	90 mm (3.5")
Transmission	>90% night / >92% day
Parallax compensation	50 m (54.7 yds) to infinity, 100 m (109 yds) arresting
Elevation / windage adjustment at 100m (109 yds)	230 cm (2.52 yds) / 90 cm (0.98 yds)
Elevation adjustment with QDC at 100m	80 cm (31.5")
Adjustment per click	1 cm / 100 m (0.39" / 109 yds)
Diopter adjustment	+2.5 / -3 diopter
Weight	770 g (27.16 oz)
Overall length	343 mm (13.5")

- › Universal magnification range
- › Elegant and compact, only 343 mm overall length
- › 20x magnification provides invaluable services to safely identify game and gives the ability to interpret and understand targets at long range.

BLASER 4–20x58iC

THE LIGHT GIANT

The twilight specialist – superior for sitting game and when hunting in the very last light. Excellent light gathering characteristics far exceed what other scopes provide in low light conditions. Making the impossible long range shot possible.

Magnification	4x – 20x
Effective lens diameter	49mm – 58mm (1.93" – 2.28")
Exit pupil diameter:	12.3mm – 2.9mm (0.48" – 0.11")
Field of view at 100 m (109 yds)	9.2m – 1.9m (10.0yds – 2.0yds)
Eye relief	90mm (3.5")
Transmission	>90% night / >92% day
Parallax compensation	50m (54.7 yds) to infinity, 100m (109 yds) arresting
Elevation / windage adjustment at 100m (109 yds)	150cm (1.64yds) / 90cm (0.98yds)
Elevation adjustment with QDC at 100m (109 yds)	80cm (31.5")*
Adjustment per click	1 cm / 100m (0.39" / 109yds)
Diopter adjustment	+2.5 / -3 diopter
Weight	885g (31.22oz)
Overall length	365mm (14.37")

- › High contrast and optimal sharpness of detail, especially in the last light
- › 58 mm lens diameter means more than 7% additional light yield compared to a 56 mm lens
- › 20x magnification provides invaluable services to safely identify game and gives the ability to interpret and understand targets at long range.

58mm Objective Lens Diameter

Compared to riflescopes featuring a 56mm objective lens diameter, 58mm provide an additional light yield of 7%. This allows use of a higher magnification with better detail recognition in deep twilight or at night.

* when using the 0.2° forward inclined Blaser Mount.

True 1x Magnification

Only with both eyes open, the shooter's peripheral vision can truly track game ensuring a safe shot. The Blaser 1-7x28iC offers this benefit thanks to its true 1x magnification. Ideal for optimum overview and rapid target acquisition.

BLASER 1-7x28iC THE INTELLIGENT ONE

The comfortable eye relief of 90mm minimizes the risk of recoil induced eye injuries on big bore rifles. The intelligent Variable Dot IVD is an invaluable assistant in hunting for strongly self-protective game which requires instant target acquisition when approaching quickly.

Thanks to the 28mm objective lens the 1-7x28iC is perfectly usable even in twilight, which makes it a versatile riflescope for worldwide hunting on all seven continents.

- › IVD (Intelligent Variable Dot), automatically activated illuminated dot for driven hunts
- › True 1x magnification
- › Very large field of view of more than 40 m
- › Large exit pupil of 10mm with 1x for rapid target acquisition
- › Large zoom range for universal use
- › 28mm lens diameter enables a 7x magnification with an exit pupil of 4mm. This enhances the field of application with poor lighting conditions.

Magnification	1x – 7x
Effective lens diameter	10mm – 28mm (0.39" – 1.1")
Exit pupil diameter	10mm – 4mm (0.39" – 0.16")
Field of view at 100m (109 yds)	40.8m – 6.0m (44.6yds – 6.6yds)
Eye relief	90mm (3.5")
Transmission	>90% night / >92% day
Parallax compensation	100m (109yds) fixed
Elevation / windage adjustment at 100m (109 yds)	180cm (1.97yds) / 180cm (1.97yds)
Elevation adjustment with QDC at 100m	---
Adjustment per click	1 cm / 100m (0.39" / 109yds)
Diopter adjustment	+2.5 / -3 diopter
Weight	645g (22,75 oz)
Overall length	319mm (12.5")

THE SOLUTION FOR WILD BOAR HUNTING AT NIGHT

BRIEFLY EXPLAINED
See the video

PRECISE CONNECTION

For hunting wild boar at night we offer an optimally coordinated combination of a premium dayscope precisely connected with a thermal clip-on device.

Liemke MERLIN-35

Blaser BL43

Blaser 1-7x28iC

With its ideal magnification range for hunting wild boar and the mounting rail extended to the front of the riflescope, the Blaser 1-7x28iC is the perfect platform for the use of thermal clip-on devices*.

A reliable connection to the riflescope is of crucial importance for a consistent and repeatable point of impact when hunting with a thermal clip-on device. Our new Blaser thermal clip-on mounts are extremely easy to operate.

Thanks to the automatic positioning of the clip-on mount, using the integrated rail of the Blaser 1-7x28iC, the installation is always repeatable, even in complete darkness.

Thanks to a recoil lug, which needs to be installed onetime into the inner rail of the Blaser riflescope 1-7x28iC, the constant positioning of the thermal clip-on device is guaranteed. When the clamping lever is closed, the thermal clip-on mount is additionally locked on the scope tube.

This ensures the highest level of repeatable accuracy even when the thermal clip-on device is frequently attached or detached.

The Blaser riflescope 1-7x28iC is suitable for every use. Whether stalking, driven hunts or hunting wild boar at night, the Blaser 1-7x28iC becomes a new universal genius in combination with the Blaser thermal clip-on mount and the appropriate thermal clip-on device*.

Blaser riflescope 1-7x28iC, Blaser thermal clip-on mount BL43 und Liemke thermal clip-on device MERLIN-35

Liemke thermal clip-on device MERLIN-13 with Blaser thermal clip-on mount BL30

Liemke thermal clip-on device MERLIN-42 with Blaser thermal clip-on mount BL52

*The Blaser thermal clip-on mount BL30 (M30x1 thread), BL43 (M43x0.75 thread) and BL52 (M52x0.75 thread) are specified for Liemke thermal clip-on devices MERLIN-13, MERLIN-35 and MERLIN-42. The use of thermal clip-on devices from other manufacturers with the M30x1, M43x0.75 or M52x0.75 thread is usually possible.

BLASER RED DOT SIGHT: WITH OPEN EYES

BRIEFLY EXPLAINED
See the video

BLASER RD20

BETTER SIGHT PICTURE – BETTER HITS

The Blaser RD20 is a red dot sight specially developed for Blaser rifles to provide a better sight picture for quick shots. It is characterized by a unique combination of large inside diameter and minimal target blockage by the housing. The original Blaser saddle mount is seamlessly integrated into the aluminum housing which results in a sleek and compact appearance with a lower overall weight. These characteristics can only be achieved when the red dot sight is perfectly matched to the rifle. The RD20 is the ideal optic for quick shots on driven hunts and as an interchangeable accessory for all Blaser rifles, making it the ideal addition to a riflescope.

IIC – Intelligent Illumination Control

When carrying the rifle muzzle up or down, or with the rifle in a resting position on the hunting stand, the red dot switches off automatically. It is activated again immediately when raising the rifle. Six hours after the last button operation, the RD20 switches off, making manual switch-off of the sight at the end of the day optional. This energy saving concept provides a battery life of up to 50,000 hours.

Inside diameter	36 mm
Diameter of red dot	2 MOA resp. 58 mm / 100 m
Magnification	1x (no magnification)
Parallax free distance	50 m
Adjustment range elevation / windage	300 cm / 100 m
Adjustment per click	2 cm / 100 m (1 cm / 50 m)
Length x Width x Height	98 x 44 x 66 mm
Weight	195 g
Waterproof	0,4 bar / 4 m water depth
Battery life	up to 50,000 hours
Illumination settings	30 levels, continuously dimmable
Operating temperature	-25°C to +50°C
Shut-off functions	IIC-Funktion

- › Better sight picture: 36 mm diameter with only 3.5 mm coverage by the housing wall
- › In all kinds of weather: Scratch-resistant protective lenses that sit almost flush with the housing - easy to clean from water drops, snow and debris.
- › Always ready: With the IIC function, the RD20 features an energy saving concept with intelligent switch-off functions and thus enables a service life of up to 50,000 hours.

OUR BINOCULARS: QUICK TO FOCUS

AN IMMEDIATE VIBRANT IMAGE FOR MAXIMUM VIEWING COMFORT

Being able to raise the binoculars to your eyes and have the perfect view – this is the formidable challenge to be met when designing hunting optics.

A completely new optical calculation combined with using the largest lenses for the eyepiece allows for significantly faster image acquisition. This delivers a particularly comfortable visual experience in any situation – even if the binoculars are not in the optimum position in relation to your eyes.

OF EXCEPTIONAL QUALITY

Performance with Intelligent Protection

Superior light transmission, neutral color reproduction and brilliant, high-contrast images are a must for long-range optics used for hunting. Our CCC multiple layer coating (Contrast and Color Corrective Coating) ensures first-class image performance in any light conditions.

Just as important as optical quality is the protection of the outer lenses. The SLP coating (Smart Lens Protection) is based on nanotechnology and ensures water and dust protection. It also allows for rain to run off and makes cleaning the lenses significantly easier.

IT DOES NOT GET ANY EASIER: REMOVE AND CLEAN

Dust or fine sand can damage both the lens surface as well as the precision mechanics of the adjustable eye cups. With our binoculars, the eye cups can be removed particularly easy and fast thanks to a newly developed technical solution. This also allows for a gentle cleaning at any time.

BLASER 8x56

KING OF THE NIGHT

First-class performance when hunting game in deep twilight and at night.

Magnification	8x
Objective lens diameter	56 mm (2.2")
Exit pupil diameter	7 mm (0.3")
Eye relief	21 mm (0.8")
Field of view (degrees)	7,6°
Field of view (at 1,000 m)	133 m (145.5 yds)
Shortest focusing distance	2.5 m (2.7 yds)
Dimensions	196x153x66 mm (7.7"x6"x2.6")
Weight	1,150 g (2lb. 8.5 oz.)
Diopter adjustment	+/- 4 diopter

BLASER 10x42

DISTANCE SPECIALIST

Ideal for hunting in the mountains or on open ground – enables you to identify detail even at great distances.

Magnification	10x
Objective lens diameter	42mm (1.7")
Exit pupil diameter	4.2mm (0.2")
Eye relief	18.3mm (0.7")
Field of view (degrees)	6.6°
Field of view (at 1,000m)	116m (127yds)
Shortest focusing distance	2m (2.2yds)
Dimensions	184x144x58mm (7.3"x5.7"x2.3")
Weight	970g (2lb. 2.2oz.)
Diopter adjustment	+/- 6 diopter

BLASER 8x42 UNIVERSAL GENIUS

Compact universal binoculars for any hunting situation.

Magnification	8×
Objective lens diameter	42 mm (1.7")
Exit pupil diameter	5.25 mm (0.2")
Eye relief	18.2 mm (0.7")
Field of view (degrees)	8°
Field of view (at 1,000 m)	141 m (154 yds)
Shortest focusing distance	2 m (2.2 yds)
Dimensions	184×144×58 mm (7.2"×5.7"×2.3")
Weight	960 g (2 lb. 1.9 oz.)
Diopter adjustment	+/- 4 Dioptrien

BLASER 8x30 GLOBETROTTER

The lightweight stalking companion for hunting in distant lands or close to home.

Magnification	8×
Objective lens diameter	30 mm (1.2")
Exit pupil diameter	3.75 mm (0.2")
Eye relief	18,1 mm (0.71")
Field of view (degrees)	8.2°
Field of view (at 1,000 m)	144 m (158 yds)
Shortest focusing distance	2 m (2.2 yds)
Dimensions	118×114×50 mm (4.6"×5"×2")
Weight	475 g (1 lb. 0.8 oz.)
Diopter adjustment	+/- 6 diopter

R8

A HUNTING RIFLE THAT IS UNMATCHED IN EVERY WAY

Just as diverse as hunting, so are the demands hunters place on their rifles. To say the R8 is just a bolt action rifle is the understatement of the century. More than just a rifle it is a platform that allows you the flexibility to interchange calibers while providing ergonomic perfection in stock design and unequaled trigger performance.

BRIEFLY EXPLAINED
See the video

ACCURATE

Blaser Precision Trigger

The desmodromic trigger mechanism guarantees your trigger will function even when iced or heavily soiled. The mechanical advantage of a simple lever will ensure success even in the harshest conditions. When things are going your way a trigger without creep, will turn that thought impulse into action.

Blaser Saddle Mount

Barrel and Saddle Mount form one accurate unit: Notches machined into the top of the barrel, directly above the chamber, insure while your barrel freely floats your point of impact remains constant.

Optimum Barrel Bedding

The large-scale bedding of the barrel exclusively in the solid receiver guarantees repeatable accuracy when exchanging the barrel. Stock deformation due to extreme weather can never affect the position of the barrel.

Blaser Radial Locking System

Stability and reliable accuracy: The extremely strong, concentric locking system locks directly in the barrel without any rotary motion. 14 locking surfaces provide 360 degree engagement.

Forged Barrel and Chamber

Precision and durability: The barrel and chamber are cold hammer forged at the same time for most calibers. Barrel and chamber are perfectly concentric.

Perfect Stock Design

The relaxed shooting position of the hand reduces the risk of flinching. Blaser stocks, with their distinct palm swell and optimal cast, provide the ideal grip. The thumbhole stocks of the R8 Success and R8 Ultimate models go even further: thanks to a completely relaxed wrist and arm posture, shooting accuracy is significantly enhanced in any firing position.

SAFE

Manual Cocking System

For decades, Blaser's manual cocking system has set the benchmark. It is acknowledged as one of the safest in the world. There is no mechanical safety system that guarantees the safety of an uncocked firing spring. The R8 is cocked the very moment before shooting. Should the shot not be taken, by simply pressing down on the cocking lever, it will slide back smoothly, decocking the rifle.

Protection Against Misuse

If the R8 magazine with integrated trigger guard is taken out, the cocking lever cannot be set in the cocked position. This is without doubt the safest protection against unauthorized use!

No Unintentional Bolt Opening

If the R8 is decocked with a locked bolt, the bolt handle is blocked. To safely open the bolt, the cocking lever needs to be moved slightly forward (approx. 3mm/ 1/8"), but not cocked, while simultaneously pulling back on the bolt handle.

HUNTABLE

Short Cut

The unique design of the R8 magazine above the trigger allows the overall length of the R8 to be significantly shorter than any conventional bolt action rifle.

Perfect Balance

The well-balanced weight distribution offers fast handling and quick target acquisition.

Easy Take-Down

More comfort when stalking over long distances: the R8 can be stripped down, packed away and reassembled in a matter of seconds without the slightest change in the point of impact.

RELIABLE

Quick Take Down – Easily Cleaned

Even when in the bush, the R8 can be taken down and reassembled within a few seconds. Snow, dirt, leaves or needles are easily removed.

Desmodromic Trigger Mechanism

Maximum reliability – even when iced or heavily soiled. The trigger system of the R8 is force-controlled. Cycling the bolt automatically resets the trigger.

Locked Magazine

The R8 magazine is only released when simultaneously pressing both release buttons. Accidental drop out of the magazine by unintentionally pushing the release buttons is thus virtually impossible. In addition, both release buttons can be locked by a lever inside the magazine.

Excellently Protected

The closed construction of the R8 receiver prevents damage caused by foreign objects. When the magazine is stored outside the rifle, a protective cover keeps the dirt out. All metal parts are either made of rustproof material or protected against corrosion with a specific finish. The inside of the barrel and chamber are polished and need conventional care.

VERSATILE

Around the World with One Rifle

Trigger, stock length, and handling – everything remains just the way you are used to: Thanks to spare barrels, the R8 is the ideal companion on all continents no matter what game you are hunting.

Quick Scope Change

Every barrel is prepared for the Original Blaser Saddle Mount, so each scope or illuminated dot sight that is zeroed to the barrel can be interchanged.

Changing Stocks

If you are expecting bad weather or rugged terrain, the precious wooden stock can be removed and replaced with the R8 Professional synthetic stocks.

For Left-Hand Shooters

Most R8 models are available as a true left-hand version including stock, bolt assembly and ejection.

Compact Solution for Ladies and Gents:

R8 Intuition

Features a purpose-built stock which takes into account the anatomy of women.

R8 Compact

The perfect choice whenever build and height of the hunter require a shorter stock.

FAST

In-line Repeating

Fast as lightning with a relaxed posture: The bolt handle is located in an ergonomically perfect position, just above the trigger guard. Rifle and eye remain focused on the target giving more time to aim exactly and ensure a perfect shot.

“Blind” Magazine Exchange

Easy and fast: The magazine buttons can be operated “blindly” due to their perfect positioning above the trigger. When pushing on both buttons at the same time, the magazine releases straight into the shooter’s hand. A second, loaded magazine can be inserted extremely quickly without looking.

Double Loading Option

The R8 can be loaded and unloaded in two ways: with the magazine taken out or left inside the rifle. With an open bolt, cartridges can be inserted or removed from the top of the magazine very quickly and easily.

FOR LEFT-HANDED SHOOTERS

The Blaser R8 as a True Left-handed Version

For perfect precision, every hunter needs a perfect companion: the Blaser R8 is more than just a rifle – it is a legend. This is the reason why we optimized the bolt-action rifle R8 for left-handed shooters. The result: Almost every model of the Blaser R8 is now available as a true left-hand version: with a left-handed bolt handle, left-handed chamber and left-handed ejector. The ergonomic stock is available as a standard or as a success stock – either wooden or synthetic – and has also been specially adapted for left-handed shooters.

For shooters who like a maximum of flexibility, we offer the R8 Professional also with Double Palmswell – an ambidextrous option with a locking mechanism on the left and on the right.

INDESTRUCTIBLE: OUR SYNTHETIC STOCKS

Create your individual R8!

R8 ULTIMATE

The R8 Ultimate sets a new standard in terms of functionality and design. The two-piece ergonomically designed thumbhole stock ensures a completely relaxed shooting position, as well as optimal control of the rifle when firing.

Thanks to the modular stock options, the R8 Ultimate and the R8 Ultimate Silence are exactly tailored to your individual needs. All of these options support our goal: to provide what is needed to shoot better in every situation.

The R8 Ultimate with optional muzzle thread, scope Blaser 2.8–20x50 iC and mount

R8 Ultimate

- › Ergonomically optimized synthetic stock
- › Black-brown synthetic stock with black elastomer inlays
- › Available options include: adjustable comb, adjustable recoil pad, recoil absorption system

The R8 Ultimate with optional muzzle thread, recoil absorption system, scope Blaser 2.8–20x50 iC and mount

R8 Ultimate Leather

The same as the R8 Ultimate, but includes:

- › Stainless steel brace in the stock
- › Impregnated leather inlays on fore-end, pistolgrip and comb

R8 ULTIMATE CARBON

This rifle is premier class: The R8 Ultimate Carbon represents another milestone in the evolution of the R8 bolt-action rifle. Its thumbhole stock is made entirely of carbon and is ergonomically optimized.

The R8 Ultimate Carbon with optional muzzle thread, scope Blaser 2.8–20x50 iC and mount

R8 Ultimate Carbon

- › Ergonomically optimized stock made of carbon with black elastomer inlays
- › Available options include: adjustable comb, adjustable recoil pad, recoil absorption system

The R8 Ultimate Carbon Leather with optional muzzle thread, adjustable comb, adjustable recoil pad, scope Blaser 2.8–20x50 iC and mount

R8 Ultimate Carbon Leather

The same as the R8 Ultimate Carbon, but includes:

- › Stainless steel brace in the stock
- › Impregnated leather inlays on fore-end, pistolgrip and comb

Matching carbon rifle sling

Also available as R8 Ultimate Carbon Silence in the following calibers:

- › Cal. .308 Win.; 8x57 IS; 9.3x62; barrel lengths 42 cm or 47 cm (16.5" or 18.5")
- › Cal. 8.5x55 Blaser; 30-06; barrel length 47 cm (18.5")
- › Cal. .300 Win. Mag.; .300 Blaser Mag.; barrel length 52cm (20.5")

R8 ULTIMATE – HunTec Camo

We bring your equipment for active hunting in challenging terrain up to the next level: with the new Blaser HunTec Camo. The camouflage pattern makes the R8 Ultimate – HunTec Camo a master of disguise. In combination with the Blaser HunTec clothing and accessory line, it demonstrates its full strength.

The R8 Ultimate in stock color HunTec Camo with optional muzzle thread, scope Blaser 2.8–20x50 iC and mount

R8 Ultimate – HunTec Camo

- › Ergonomically optimized stock
- › HunTec camo synthetic stock with black elastomer inlays
- › Available options include: adjustable comb, adjustable recoil pad, recoil absorption system

The R8 Ultimate Leather in stock color HunTec Camo with optional muzzle thread, scope Blaser 2.8–20x50 iC, mount and recoil absorption system

R8 Ultimate Leather – HunTec Camo

The same as the R8 Ultimate HunTec Camo, but includes:

- › Stainless steel brace in the stock
- › Impregnated leather inlays on fore-end, pistolgrip and comb

Also available as R8 Ultimate Silence in the following calibers:

- › Cal. .308 Win.; 8x57 IS; 9.3x62; barrel lengths 42 cm or 47 cm (16.5" or 18.5")
- › Cal. 8.5x55 Blaser; 30-06; barrel length 47 cm (18.5")
- › Cal. .300 Win. Mag.; .300 Blaser Mag.; barrel length 52 cm (20.5")

Experience the world of
HunTec now!

R8 ULTIMATE SILENCE MODELS

Their construction is designed to protect the hearing of both hunter and dog. At any time, with every shot.

The R8 Ultimate Silence with optional scope Blaser 2.8–20x50 iC and mount

The R8 Ultimate Carbon Silence Leather with optional scope Blaser 2.8–20x50 iC and mount

The R8 Ultimate in stock color HunTec Camo with optional scope Blaser 2.8–20x50 iC and mount

The Silence models are available in following calibers

- › Cal. .308 Win.; 8x57 IS; 9.3x62; barrel lengths 42cm or 47cm (16.5" or 18.5")
- › Cal. 8.5x55 Blaser; 30-06; barrel length 47cm (18.5")
- › Cal. .300 Win. Mag.; .300 Blaser Mag.; barrel length 52cm (20.5")

All R8 Ultimate Silence models are available with either elastomer or impregnated leather inserts on the fore-end, pistol grip and rear stock inlay.

R8 ULTIMATE – EQUIPMENT OPTIONS

Adjustable Comb

The intuitively operated, multi-level adjustable comb ensures the perfect mount in every situation.

Once the adjustable comb is fitted to your individual body proportions and your optics, the integrated memory function ensures return to the correct comb position for every shot.

Recoil Absorption System

The inserted recoil pad with recoil absorption system makes for a pleasant shooting experience – even with larger calibers.

The internal absorption elements are available in different hardness which can be adjusted to your preferences and produce a noticeably reduced muzzle climb while shooting.

The recoil absorption system, especially in combination with the R8 Ultimate Silence or another silencer option, offers unmatched comfort while shooting.

Adjustable Recoil Pad

The adjustable length, height and pitch of the recoil pad offers a variety of practical advantages. It can be adjusted quickly and easily for different shooters or, depending on weather, different clothing situations.

R8 PROFESSIONAL

The R8 Professional is designed for hard use: elastomer inlays support secure grip and aiming even in wet conditions. The specially developed recoil pad combines outstanding recoil reduction with excellent sliding characteristics.

The R8 Professional, stock color black-brown with optional scope Blaser 1–7x28 iC and mount

R8 Professional

- › Synthetic stock with black elastomer grip inlays, available in dark green, savannah or black-brown
- › Optional adjustable comb
- › Optional with left-hand stock and bolt assembly

The R8 Professional Tracking, stock color dark green

R8 Professional Tracking

The same as the R8 Professional, but includes:

- › Short tracking barrel (50cm/19.7") and HIVIZ® quick acquisition sights
- › Retainers for sling swivels on the muzzle as well as on both sides of the stock

Matching Tracking rifle sling

Stock color dark green

Stock color savanne

Stock color black-brown

R8 PROFESSIONAL SUCCESS

Ergonomically perfect, relaxed shooting position, superior control over the rifle, optimal position of the trigger finger: Once used to a thumb-hole stock, hunters rarely ever look back to using a standard stock.

Made from the same material as our R8 Professional stocks, the R8 Professional Success combines the ergonomics of a thumbhole stock with the durability and reliability of the R8 Professional.

The R8 Professional Success, stock color dark green with optional scope Blaser 2.8–20x50 iC and mount

R8 Professional Success

- › Ergonomically perfect synthetic stock
- › Dark green or black-brown stocks available with black elastomer grip inlays
- › Optional with left-hand stock and bolt assembly

R8 SMALL CALIBER SET

The Blaser R8 is as versatile as hunting itself. With interchangeable sets in the calibers .17 Hornet, .22 LR, .22 WMR and .22 Hornet, you can now hunt small game or varmint with your favorite, large-caliber rifle.

And because of the lower prices for ammunition, you save costs when practising extensively at the shooting range. The small caliber set includes R8 interchangeable barrel, bolt head and magazine with a capacity of up to 6 cartridges.

R8 CALIBERS – UNIQUELY VERSATILE

50 calibers in 9 caliber groups*

From .17 Hornet to .500 Jeffery

8 barrel contours
standard, standard fluted, model “Nachsuche”,
semi-weight, semi-weight fluted, safari, match, silence

Discover all R8 calibers now.

Only one new barrel is required when changing within a caliber group.
For a specific caliber group – only one bolt head is required for that caliber group.
(Magazine included with every barrel)

SOUND OF SILENCE

OUR SILENCER SOLUTIONS

Every shot can cause irreparable damage to your hearing. It is therefore advisable to wear suitable hearing protection at all times when shooting. Practical considerations when hunting means that this is not always possible.

Using silencers represents the far better solution. They provide less risk of hearing damage and the pain threshold of 130dB at the ear is rarely reached. Moreover, silencers have a particularly positive effect on the shooting performance. Besides the muzzle report, a silencer also considerably reduces recoil which is a significant part of achieving better accuracy.

BLASER R8 VS. BLASER R8 SILENCE
See the video

R8 SILENCE MODELS

The construction of the R8 Silence is designed to protect the hearing of both hunter and dog. At any time and with every shot. Thanks to the even weight distribution of the entire barrel, the R8 Silence models provide the first-class balance and huntability that you are used with every R8 model. The outer contour of the barrel and silencer jacket boasts a smooth bull barrel design, giving the R8 Silence models their low weight and an extremely attractive overall appearance.

The R8 Ultimate Carbon Silence Leather in caliber .30-06 (barrel length 47 cm) with additional Blaser 2.8-20x50 iC scope and mount

Baffle design and geometry is the heart of every silencer. It is largely responsible for reducing the recoil – and in combination with the large volume of the silencer – reducing the sound of the shot and protecting a shooter's hearing. For the Blaser Integral Silencer (ISD), the geometry was optimized to the maximum diameter – while still maintaining the overall aesthetic of the rifle itself.

Within a fraction of a second – all the processes take place inside the silencer – which ensure recoil reduction and noise dampening when the shot is fired. As an example, with a barrel length of 42cm (16.5") in .308 Win, the projectile emerges from the muzzle at a velocity of 750m/s. It passes completely through the length of the Integral Silencer in just 0.27 milliseconds.

The muzzle brake deflects a part of the gases rearward, in an evenly dispersed fashion. Like the outer tube, the muzzle brake is made of titanium, which ensures minimum weight and optimum durability. It is also responsible for ensuring that the Blaser Integral Silencer can be properly attached to the muzzle thread of the barrel. This allows the bullet to pass through the silencer without obstruction. With this high-strength material and its precise manufacturing – the problems with bullet striations and the resulting change in the point of impact are now a thing of the past.

The Silence models are available in following calibers

- › Cal. .308 Win.; 8x57 IS; 9.3x62; barrel lengths 42 or 47cm (16.5" or 18.5")
- › Cal. .8.5x55 Blaser; 30-06; barrel length 47cm (18.5")
- › Cal. .300 Win. Mag.; .300 Blaser Mag.; barrel length 52cm (20.5")

Cross-section of barrel with integral silencer

The innovative design of the Blaser Integral Silencer allows for use of the entire length of the silencer as an expansion space for the powder gases – while maintaining its slim overall appearance. The inner tube of the Blaser Integral Silencer (ISD) contains and closes off the expansion chamber and keeps the gases from contacting the surface of the barrel itself. The barrel always remains clean and is reliably protected against powder residues, contamination and corrosive residues.

Blaser Integral Silencer

R8 ULTIMATE SILENCE

The R8 Ultimate Silence with optional scope Blaser 2.8–20x50 iC and mount

R8 Ultimate Silence

- › Overall barrel length 62.5cm (24.6") (effective barrel length 42cm (16.5"))
- › Barrel jacket with integrated silencer, quickly and easily detachable
- › Ergonomically optimized synthetic stock

- › Black-brown synthetic stock with black elastomer inlays
- › Available options include: adjustable comb, adjustable recoil pad, recoil absorption system
- › Noise reduction approx. 28 dB (Cal. .308 Win.)

R8 ULTIMATE CARBON SILENCE

The R8 Ultimate Carbon Silence with optional scope Blaser 2.8–20x50 iC and mount

R8 Ultimate Carbon Silence

The same as the R8 Ultimate Silence, but includes:

- › Ergonomically optimized synthetic stock made of carbon

R8 ULTIMATE SILENCE – HunTec CAMO

The R8 Ultimate Silence – HunTec Camo with optional scope Blaser 2.8–20x50 iC and mount

R8 Ultimate Silence – HunTec Camo

The same as the R8 Ultimate Silence, but includes:

- › Ergonomically optimized synthetic stock in stock color HunTec Camo

All R8 Ultimate Silence models are also available with impregnated leather inserts on the fore-end, pistol grip and rear stock inlay.

R8 SILENCE

The R8 Silence with optional grade 7 wood, scope Blaser 2.8–20x50 iC and mount

R8 Silence

- › Overall barrel length 62.5cm (24.6") (effective barrel length 42cm (16.5"))
- › Barrel jacket with integrated silencer, quickly and easily detachable
- › Matt black receiver
- › Butt stock with Bavarian cheek piece and double rabbet
- › Grade 4 wood
- › Rubber recoil pad
- › Ebony fore-end tip
- › Optional with left-hand stock and bolt assembly
- › Noise reduction approx. 28 dB (Cal. .308 Win.)

ic illumination
CONTROL

R8 SUCCESS SILENCE

The R8 Success Silence with optional grade 7 wood, scope Blaser 2.8–20x50 iC and mount.

R8 Success Silence

The same as the R8 Silence, but includes:

- › Two-piece, ergonomically perfect walnut wood thumbhole stock
- › Stainless steel brace in the stock

R8 SUCCESS SILENCE LEATHER

The R8 Success Silence Leather with optional grade 7 wood, scope Blaser 2.8–20x50 iC and mount.

R8 Success Silence Leather

The same as the R8 Success Silence, but includes:

- › Impregnated leather inlays in cocoa on fore-end, pistol grip and comb

BLASER SILENCERS

Blaser On-Barrel Silencer

Blaser's On-Barrel Silencer is designed to meet the requirements and needs of hunters. It is threaded onto the barrel forward of the front sight.

Thanks to the silencer's slim design you are still able to shoot using your open sights. Aerospace grade aluminum alloy combined with titanium insure the Blaser On-Barrel Silencer is one of the lightest on the market and still offers an outstanding service life.

Versions

Version 6.5 mm
Version .30
Version 9.3 mm

Caliber group

≤ 6.5 mm
≤ .30 (7.62 mm)
≤ 9.3 mm

Technical Data

Diameter	42.9 mm (1.69")
Total length	203.1 mm (7.99")
Real extension	188 mm (7.40")
Barrel overhang	15 mm (0.59")
Weight	325 g (0.72 lb) for .30 Caliber
Noise reduction	27 dB (C) for Cal. .308 Win.

Every R8 and K95 can optionally be factory fitted and retro-fitted with the required muzzle thread for the silencer.

Please note all barrels with sights require the front sight to be set back approximately 17mm / 0.67". It is also suggested

to use a thread protector cap when the silencer is not installed.

Blaser Over-Barrel Silencer

The Blaser Over-Barrel Silencer is the ideal solution when short overall length is required. The combination of a special aluminum alloy and steel ensures it is lightweight while still having a long service life.

It should be taken into account that the Blaser Over-Barrel Silencer can only be mounted on barrels without open sights. For retrofitting a muzzle thread with cover, the front sight must be removed.

Versions

Version 6.5 mm

BLASER SADDLE MOUNT

Properly Connected. Guaranteed.

Blaser's original Saddle Mount has revolutionized the connection between the rifle and the scope. Its consistent accuracy, reliability and precision are legendary and unmatched. Only the original Blaser Saddle Mount secures you a 10-year guarantee for the shooting performance of our rifles.

Blaser

Mod KQ59

SIMPLE, FLEXIBLE AND 100% RETURN TO ZERO

Every Blaser rifle or combination gun can be fitted with an original Blaser Saddle Mount. After being zeroed in once, the riflescope can be removed and replaced in just three steps, with no need for tools, as often as desired, with 100% return to zero. This allows you the flexibility to use different scopes on the same barrel.

Four inconspicuous notches on the chamber end of the barrel secure the one-piece mount without tension. The barrel itself is totally free floating. No further work is required on the firearm, and there is no need for large mount bases that can interfere with your sight picture or the look of the rifle.

- 1** The Blaser Saddle Mount is placed in the notches on the barrel with the locking levers open.
- 2** No tools are needed to rotate the locking levers into position. This releases the tension on the mount lock on the barrel. To prevent the locking levers interfering with the use of the rifle, they are folded inwards.
- 3** The riflescope is properly positioned and ready for zeroing. The Blaser Saddle Mount can be removed and replaced as often as you wish, with no need to re-zero.

A close-up, artistic photograph of a metalworking process. A lathe tool is shown cutting a piece of metal, with a large, dark, polished metal handle visible. The background is blurred, showing more of the workshop environment. The lighting is dramatic, highlighting the textures of the metal and the precision of the tool.

Upon your

Request

Hunting has been mankind's passion since the beginning of time. In the Blaser Custom Shop, we bring together this passion and our craftsmanship to create the firearm of your dreams. There are almost unlimited possibilities to express your personality. Get inspired!

C u s t o m

Because we

Love
what we do

Ever since, the embellishment of rifles and guns has been a special vocation, our masters have a trained eye for harmonious shapes, precise fitting and the perfect surface finish. Their sensitive hand turns your ideas into reality. Our devotion to perfection is evident in every custom crafted firearm. No firearm ever leaves the Blaser Custom Shop until it is completely flawless, a true work of art.

Details can include fine engravings, gold inlays and a satin or gloss finish framed by stunning wooden stocks. But don't let your imagination stop there. Explore the idea of using carbon fiber, Ruthenium, cowhide or sting ray leather and fossilized mammoth ivory which are all exciting options. Possibilities are almost unlimited in giving your hunting firearm its very own, personal style.

You are the driving force and decision maker. Our role is simply to embrace your vision, guide you and contribute ideas based upon our expertise.

Exclusively for you we have composed further selected Blaser Custom firearms in our Online Gun Room. Get inspired and find your perfect match!

Blaser

Blaser

Dance

of the Rattlesnake

The realistically portrayed reptiles sinuously undulate across both sides of the receiver of this richly detailed artwork. Engraved entirely in relief, the rattlesnakes are carved using a particularly sculpted effect. Thanks to the fine play between light and shadow, they appear as if they are literally slithering out from the background.

The snake head on the bolt housing has a particularly intense stare. Its detailed scale motif extends all the way from the bolt to the barrels. The head of a second snake in mid-strike crowns the pistol grip cap. Fine gold inlays make this impressive interpretation perfect.

Model **R8 Rattlesnake**
Engraver **Rolf Kaufmann**

King of the Mountains

The Alpine ibex represents strength, grace and endurance. He is the undisputed king of the mountains. Master engraver Alexandra Feodorow made him the dominant motif of this K95.

The head, engraved on the underside with the finest of quill strokes, is framed by alpine meadow flowers and edelweiss. Low-relief floral motifs of edelweiss and thistle decorate the receiver. The side plates depict the ibex in his natural habitat. The top lever, sculpted in the likeness of an edelweiss, is the crowning achievement of this composition in select walnut burl wood.

Model **K95 Alpine Ibex**
Engraver **Alexandra Feodorow**

Exclusive

Alligator Leather

Made from a single hide. Over the course of many patience-testing hours. And with a skill that hints at magic. Covering the stock and pistol grip as well as the entire receiver and forearm. No machines here: this is the work of a master's hand. That is truly a masterpiece!

R8 The Southern Trapper

Model **R8 The Southern Trapper**

Call of the

Wild

It is wild and untamed. It is a place of myths and legends. It is both habitat and source of nourishment. Since the beginning of time, we hunters have been inseparably bound to it.

The R8 The Wood is an homage to the forest. Its leitmotif is its abundant flora. A highly detailed conifer cone structure in relief decorates the bolt, receiver, magazine bolt plate and trigger guard. The bolt handle is transformed into a branch that ends in the bolt handle ball. Formed as a conical, tapered pine cone, this ball is the highlight of this R8 straight-pull bolt-action rifle with a thumbhole stock made from the finest walnut wood. Golden acorns and berries framed in dense foliage are a harmonious complement to its extraordinary appearance.

Model **R8 The Wood**
Engraver **Josephine Gröbel**

Model **R8 200,000**
Engraver **Richard Maier**

Hunter

of the World

Every legend tells a story. The idea for the delicate engraving of the Blaser R8 200,000 goes back to the roots of mankind, the origin of our lives, and holistically tells the story of hunting. The artistic theme of hunters and shamans was initialized by Trompeter & Ritchi.

An African shaman lights the fire and a new world opens: the world of hunting. Animals from five continents appear in the rising smoke. The four elements fire, water, earth and air are witnessing this scene. The fifth element symbolizes the spirit. Based on this leitmotif, master engraver Richard Maier created an incomparable artwork of the finest engraving, engraved in relief, bulino and scrimshaw techniques.

Engraver Richard Maier places up to 700 engraving points per square millimeter by hand – under the microscope – to breathe a soul into his engravings. He deliberately avoids edges and ornaments – his engravings are organic and become one with the objects. Realistic portraits of people and animals, designed with attention to detail, form an incomparable ensemble without overloading the rifle optically. Like in a picture, the precious root wood stock with genuine, fine leather inlays, frames the artistic composition of the engravings.

The Roots of

Rankin

Model **F3 Field Hunting**
Engraver **Fabio Bonsi**

Symphony

of Ornaments

It is the epitome of shotguns and a tribute to fine engraving: the F3 Field Hunting. On this F3 designed by master engraver Fabio Bonsi, opulent English arabesques combined with beautiful inlays made of fine gold cover the barrel, the profile of the receiver and the cocking lever. The filigree ornamentation frames the side plates: They show retrieving dogs in the forest in bas-relief engraving. The 18-carat gold-plated trigger forms the elegant highlight of this noble shotgun symphony.

Under the

African

Sun

Silhouettes of African animals in the sunset – this is where master engraver Stefano Pedretti demonstrates his artistic skills. Rhino, lion, elephant, cape buffalo, zebra and leopard seem close enough to touch because of their photo-realistic visual representation in the classic Bulino style. The warm yellow tone made of solid fine gold underlines the unique lighting atmosphere. On the bolt housing and the bottom, sweeping arabesques and filigree gold inlays with blueing create an exciting interplay.

A special eye-catcher is the bolt handle ball. Delicately engraved, it boasts gold inlays and impresses with its radiant, half-carat gemstone. The highly polished barrel and the contrasting class 11 root wood of the stock give this rifle an extraordinary frame.

Model **R8 African Continent**
Engraver **Stefano Pedretti**

Admired & Desired

Pure understatement – the platinum metal ruthenium is one of the rarest precious metals in the world; and is the namesake for this top-notch custom rifle.

R8 Ruthenium

- › Receiver, trigger guard, magazine base and bolt housing with ruthenium finish
- › Trigger, bolt handle ball and bolt head with high-gloss finish and DLC (Diamond-Like-Carbon) coating
- › Stock with Bavarian cheek piece and double rabbet
- › Coated openwork pistol grip cap made of steel with ebony inlay
- › Fluted barrel
- › Grade 8 wood with Super-Finish
- › Silver plated R8 lettering
- › Includes rifle case B and leather rifle sling
- › Optional with left-hand stock and bolt assembly

Reminiscence of

Africa

This rifle is named after the magnificent Selous Game Reserve in Tanzania and is only available in big game calibers and with a receiver made of steel. Beyond that, the special look of this rifle is unique: by heating and cooling in phases of different length, the steel develops a very individual color, which gives each rifle its distinct appearance.

R8 Selous

- › Blued steel receiver
- › Selous lettering inlaid with gold
- › Gold-colored trigger
- › Bolt handle ball inlaid with gold
- › Safari open sights: express sight, classic ring mount, silver bead
- › Sling swivel with ring around the barrel
- › Safari stock with larger radius at comb and Monte Carlo cheek piece
- › 2.7cm (1.1") safari rubber recoil pad
- › Kickstop
- › Safari fore-end with ebony fore-end tip
- › Grade 7 wood
- › Compatible with all R8 barrels

Noblesse

Oblige

Technical perfection and the art of engraving complement each other harmoniously. Two types of hunting rifles, two different designs. With both based on one essential idea: an elegant appearance combined with a traditional look. These stylish rifles are a dream come true for hunters who are passionate about style, design, reliability and precision.

R8 Baronesse

- › Fully engraved receiver, option of red deer or wild boar motifs on the left-hand side and roe deer or chamois on the right
- › Gold-colored trigger and bolt head
- › Wooden ball on the bolt handle
- › Fluted barrel
- › Stock with Bavarian cheek piece and double rabbet
- › Rubber recoil pad
- › Ebony fore-end tip
- › Grade 8 wood
- › Including rifle case B and leather rifle sling
- › Optional with left-hand stock and bolt assembly

K95 Baronesse & Baronesse Stutzen

- › Receiver with long side plates
- › Available with optional animal or fine ornament engraving
- › Gold colored trigger and breech block
- › Octagonal barrel
- › Rubber recoil pad
- › Grade 8 wood
- › Ebony fore-end tip
- › Stock with Bavarian cheek piece and double rabbet shadow line
- › Supplied with type A rifle case and leather rifle sling
- › Optional left-hand stock

K95

YOUR TARGET: ONE SHOT

Elegant, huntable, accurate – Blaser's K95 single-shot rifle has proven itself in demanding hunting situations for decades. Then, as now, it embodies hunting in its most elemental form. Its harmonious design and compact shape make it a particular pleasure to use wherever you are hunting.

HUNTABILITY AT ITS FINEST. MADE FOR LEFT-HANDED SHOOTERS.

The Blaser K95 with True Left-handed Stock.

Its huntability and elegance are second to none: The Blaser single shot rifle K95 is the perfect choice no matter where you hunt. Exclusively for left-handed shooters, we can now offer this compact rifle as a true left-handed version with ergonomically optimized left-handed stock.

Create your individual K95!

K95 ULTIMATE

Robust design and legendary shooting accuracy. Thanks to its ergonomically optimized synthetic thumbhole stock, the K95 Ultimate combines tradition and functionality in a unique way.

The K95 Ultimate with optional scope Blaser 2.8–20x50 iC and mount

K95 Ultimate

- › Ergonomically optimized synthetic thumbhole stock
- › Black-brown synthetic stock with black elastomer inlays
- › Available options include: adjustable comb, adjustable recoil pad, recoil absorption system K95 Ultimate

The K95 Ultimate Leather with optional scope Blaser 2.8–20x50 iC, mount and recoil absorption system

K95 Ultimate Leather

As the K95 Ultimate, but includes:

- › Impregnated leather inlays on fore-end, pistol grip and comb

K95 ULTIMATE CARBON

The K95 Ultimate combines tradition and technology in a unique way. The two-piece ergonomically designed thumbhole stock ensures a completely relaxed hand position, as well as optimal control for accurate shooting.

The Carbon fiber offers an astoundingly high strength at an extremely low weight – this makes the K95 Ultimate the best choice when stalking long distances through impassable terrain. With the modular stock options it can be adjusted to your individual demands.

The K95 Ultimate Carbon with optional scope Blaser 2.8–20x50 iC, mount and recoil absorption system

K95 Ultimate Carbon

- › Ergonomically optimized carbon thumbhole stock
- › Impregnated leather inlays in cocoa
- › Available options include: adjustable comb, adjustable recoil pad, recoil absorption system

Adjustable Comb

The intuitively operated, multi-level adjustable comb ensures the perfect mount in every situation.

Once the adjustable comb is fitted to your individual body proportions and your optics, the integrated memory function ensures return to the correct comb position for every shot.

Recoil Absorption System

The inserted recoil pad with recoil absorption system makes for a pleasant shooting experience – even with larger calibers.

The internal absorption elements are available in different hardness which can be adjusted to your preferences and produce a noticeably reduced muzzle climb while shooting.

Adjustable Recoil Pad

The adjustable length, height and pitch of the recoil pad offers a variety of practical advantages. It can be adjusted quickly and easily for different shooters or, depending on weather, different clothing situations.

K95

With a newly designed stock and receiver the tradition of the single-shot rifle will continue into the future. The higher, straighter comb makes for a pleasant shooting experience and underlines the timeless appearance of the K95.

The K95 with optional scope Blaser 2.8–20x50iC, mount and grade 7 wood

K95

- › Receiver matt black
- › Round barrel profile
- › Black trigger
- › Rubber recoil pad as standard
- › Grade 3 wood
- › Ebony fore-end tip
- › Stock with Bavarian cheek piece and double rabbet
- › Optional left-hand stock

ic illumination
CONTROL

The K95 Stutzen with optional scope Blaser 2.8–20x50 iC, mount and grade 7 wood

K95 Stutzen

As the K95, but includes:

- › Split Stutzen fore-end
- › Black fore-end tip
- › Barrel length of 50cm (20")

MODULAR SYSTEM

K95 exchangeable barrels are available in numerous calibers and different versions so that it is easy to set up this versatile rifle for a wide variety of challenges. Once zeroed, every barrel fits and allows you to hit your target effortlessly.

Create your individual K95!

K95 CALIBERS

27 Calibers in 7 Caliber Groups

Due to the Blaser tilting block lock of the K95 you only need to change the barrel once between the different caliber groups.

from .22 Hornet to 9,3x74 R

When changing the caliber, the barrels of the K95 only need to be fitted once. They then can be changed as often as required. Thanks to the original Blaser saddle mount, once zeroed, every barrel fits and allows you to reliably hit your targets.

3 Barrel Profiles
round, octagonal, octagonal fluted

All K95 Kalibers at a glance.

COMBINATION GUNS

EVERYTHING YOU NEED

Hunting is as varied as the different hunting grounds you go to. Whether you use a large or small caliber, each rifle has its own specific area of application. The same goes for shot – in many cases shooting with shot is the only option due to safety reasons when hunting down game. It is therefore essential to be prepared for any situation.

O&U SHOTGUN RIFLE BBF 95 / BBF 97

Shotgun and rifle – the classic at Blaser. The barrels can be adjusted to each other by a qualified gunsmith. This means that the Blaser BBF is unbeatable for shotgun slugs.

*The BBF97 Luxus with optional scope
Blaser 2.8-20x50 iC and mount*

BBF95 and BBF97

- › Receiver with grained side plates
- › Grade 3 wood
- › Blaser precision triggers
- › Barrels float freely
- › Stock with Bavarian cheek piece
- › Optional left-hand stock

BBF95 and BBF97 Prestige

- As the BBF95 and BBF97, but includes:
- › Side plates with arabesque engraving

BBF95 and BBF97 Luxus

- As the BBF95 and BBF97, but includes:
- › Side plates can have an animal or fine arabesque engraving
 - › Grade 4 wood

Single-lock or double-lock? It's your choice!

Combination guns from the 95 model series are fitted with a single-lock and combined guns from the 97 model series with double-locks. This means that there are two strikers and two firing pin springs in the system. Both systems have their benefits.

The advantage of the 95 system is the slightly simpler operation, as only one firing pin spring needs to be cocked. This means that the firearm is automatically decocked after a single shot has been fired and the safety is engaged.

The advantage of the 97 system is that when a second shot is required, it can be released very quickly without having to be recocked. The 97 system is particularly useful for hunters who frequently have the opportunity of firing a second shot quickly.

BERGSTUTZEN BS 95 / BS 97

Many hunters, particularly those with mixed small game and in mountainous hunting areas, want to be able to carry a single firearm with two different calibers. The upper, smaller barrel of the BS 95 or BS 97 lies in a carrier tube and can be adjusted precisely to the bottom barrel.

The BS 95 Luxus with optional scope Blaser 2.8-20x50 iC and mount

Bergstutzen BS 95 and BS 97

- › Receiver with grained side plates
- › Grade 3 wood
- › Blaser precision triggers
- › Barrels float freely
- › Stock with Bavarian cheek piece
- › Optional left-hand stock

BS 95 and BS 97 Prestige

- As the BS 95 and BS 97, but includes:
- › Side plates with arabesque engraving

BS 95 and BS 97 Luxus

- As the BS 95 and BS 97, but includes:
- › Side plates can have either an animal or arabesque engraving
 - › Grade 4 wood

Single-lock or double-lock? It's your choice!

Combination guns from the 95 model series are fitted with a single-lock and combined guns from the 97 model series with double-locks. This means that there are two strikers and two firing pin springs in the system. Both systems have their benefits.

The advantage of the 95 system is the slightly simpler operation, as only one firing pin spring needs to be cocked. This means that the firearm is automatically decocked after a shot has been fired.

The advantage of the 97 system is that when a second shot is required, it can be fired very quickly without having to be recocked. The 97 system is particularly useful for hunters who frequently have the opportunity of firing a second shot quickly.

DOUBLE RIFLE BB 97

Thanks to free floating and adjustable barrels, the range of applications for the BB 97 goes far beyond driven hunts. The BB 97 can also be ordered with a single trigger.

The BB 97 Luxus with optional single trigger, scope Blaser 1–7x28 iC and mount

Double Rifle BB 97

- › Receiver with grained side plates
- › Grade 3 wood
- › Blaser precision triggers
- › Optional single trigger
- › Barrels float freely
- › Stock with Bavarian cheek piece
- › Optional left-hand stock

BB 97 Prestige

- As the BB 97, but includes:
- › Side plates with arabesque engraving

BB 97 Luxus

- As the BB 97, but includes:
- › Side plates can have either an animal or arabesque engraving
 - › Grade 4 wood

BOCKDRILLING BD 14

As hunters, we learn to expect the unexpected, whether in a blind or stalking, so it's understandable that we dream of a firearm that will allow us to take advantage of any situation. With the Bockdrilling BD 14, Blaser has developed the perfect blind and stalking firearm – compromises are finally a thing of the past.

The BD 14 has a double-lock system so that a second shot can be taken without having to recock the firearm. Thanks to the free-floating barrels, the point of impact remains constant even with a quick succession of shots, no matter which barrel was fired first. The extremely strong vertical block lock on the BD 14 helps contribute to the high degree of precision.

The BD 14 with optional grade 7 wood, scope Blaser 2.8-20x50 iC and mount

BD 14

- › Steel-grey anodized receiver, optional black anodizing
- › Stock with Bavarian cheek piece
- › Rubber recoil pad
- › Black fore-end tip
- › Grade 3 wood
- › Optional left-hand stock
- › Barrels can be adjusted to each other

BD 14 Luxus

As the BD 14, but includes:

- › Animal engraving: choose from red deer and roe deer; red deer and fox with duck; wild boar and roe deer
- › Grade 4 wood

The BD 14 Baronesse with optional grade 9 wood, scope Blaser 2.8-20x50 iC and mount

BD 14 Baronesse

As the BD 14, but includes:

- › Long side plates with arabesque engraving
- › Titanium-nitrided triggers
- › Engraved black trigger guard
- › Grade 7 wood

DRILLING D99

The Drilling D99, with its two shotgun barrels and a rifle barrel, is the best all-rounder. It is the ideal firearm for hunting in areas with small and big game animals. The D99 has a double-lock system so that a second shot can be taken with no hesitation and without recocking.

Thanks to the free-floating barrels, the point of impact remains constant even with quick follow-up shots. The extremely strong vertical block lock on the D99 helps contribute to its exceptional accuracy.

The D99 with optional scope Blaser 2.8-20x50 iC, mount and rubber recoil pad

D99

- › Edge point engraving with small arabesques
- › Black fore-end tip
- › Optional with half-beaver tail fore-end
- › Stock with Bavarian cheek piece
- › Grade 3 wood
- › Optional left-hand stock

The D99 Luxus with optional scope Blaser 2.8-20x50 iC and mount

D99 Luxus

As the D99, but with:

- › Hand-engraved arabesque engraving
- › Grade 4 wood

F16

THE LATEST SHOTGUN CLASS

Perfection from passion: Have you ever taken a new shotgun in your hands and immediately felt familiar with it? This is exactly the experience most shooters have when taking the F16 in their hands for the first time. By devising the lowest profile receiver in its class, the F16 is provided with an exceptionally low center of gravity. This leads to an outstanding balance and less felt recoil at the same time making it the perfect companion for both hunters and ambitious clay target shooters.

SEE THE F16 IN ACTION

CONCENTRATION AND SAFETY. INTUITION AND BALANCE.

Triplex® Bore design

Three construction characteristics combine to provide optimized muzzle velocity, a homogeneous shot pattern and help dampen recoil:

- Innovative, extremely flat forcing cone. The shot stream passes into the cylindrical barrel as smoothly as possible with minimal deformation and without any dangerous increase in pressure
- "Overbore" internal diameter of 18.65mm (0.735")
- 12/76 gauge with additional steel shot proofing

Reinforced firing

The F16 has been designed from the ground up to use steel shot and dealing with the stresses of using this type of ammunition have been incorporated throughout the design process.

Innovative monocoque receiver design

Design concepts developed in Formula1 racing were the basics in selecting of materials for the F16. From the unique Gun Metal Grey surface coatings to laser hardening principals developed for cars traveling at 230MPH. Safety and strength are more than words they are a necessity.

Lowest profile receiver in its class

provides an exceptionally low center of gravity for the shotgun, makes it extraordinary pointable and dynamic, immediately leading to a better shot.

Blaser IBS® – Inertial Block System

The IBS® system eliminates the chances of fan firing or doubling and is integral to our World Class trigger's reliability.

Blaser EBS® – Ejection Ball System

The EBS® system activates the ejectors when a shot is fired and cocks them when opening the gun. The ejector springs are always decocked when the gun is stored in order to prevent spring fatigue. Resistance when closing the gun is always kept to a minimum, whether the ejectors were previously activated or not.

Best in class trigger characteristics

It is here where the ingenious German engineering comes in. Purely mechanical in design this single selective trigger breaks like glass at 1,650g (3lb.10oz.) and operates independent of recoil. In a world measured in milliseconds your F16 is a significant advantage with intuitive shooting.

Create your individual F16!

F16 GAME

Ahead of the game: Its unique pointability makes the F16 Game a perfect hunting companion.

The F16 Game with optional grade 4 wood

Gauge	12/76	Drop	Standard: 38/56mm (1.50"/2.20") (Game stock) Optional: 38/50mm (1.50"/2") (Sporting stock)
Barrel	71cm or 76cm (28" or 30")	Offset	3/6/8mm (0.12"/0.24"/0.31")
Firing	Reinforced firing with additional steel shot test	Pitch	84°
Sight	Nickel-silver pearl bead 3mm (0.12") 9mm (0.35") Rib, tapered to 7.5mm (0.30")	Stock length	375mm (14.37") incl. recoil pad
Chokes	Blaser chokes – flush to muzzle 1/4, 1/2, 3/4 incl. choke wrench (standard). Additional Blaser chokes, flush to muzzle (cylinder up to 1/1) as well as extended Briley Spectrum chokes (Skeet to 5/4) are available at extra cost	Butt plate	Blaser Comfort recoil pad
Receiver	"Gun Metal Grey" with F16 logo, silver colored	Fore-end	English Style
Trigger	Trigger pull 1,650g (3lb. 10oz.)	Balancer	Optional balancer in the stock (extra cost)
Barrel selector	Selection of the preferred shot sequence, conveniently placed in front of the trigger	Weight	From approx. 3.1kg (6lb. 13oz.)
Wood grade	Standard: 3 Optional (extra cost): Grade 4 wood	Accessories	Incl. ABS travel case Incl. sling swivel for subsequent mounting

Optional left-hand stock, butt stock with adjustable comb and Sporting stock (38/50mm)

F16 SPORTING

At home on the shooting range! Thanks to balancer in the butt stock and the possibility to fix balancer weights on the barrel, the F16 Sporting can be balanced individually. In combination with the adjustable trigger blade it is the perfect prerequisite for your competition success.

The F16 Sporting with optional grade 4 wood

Gauge	12/76
Barrel	76cm or 81cm (30" or 32")
Firing	Reinforced firing with additional steel shot test
Sight	Red bead 3mm (0.12") 9mm Rib, tapered to 7.5mm (0.30")
Chokes	Blaser chokes – flush to muzzle 1/4, 1/2, 3/4 incl. choke wrench (standard). Additional Blaser chokes, flush to muzzle (cylinder up to 1/1) as well as extended Briley Spectrum chokes (Skeet to 5/4) are available at extra cost
Receiver	"Gun Metal Grey" with red F16 logo
Trigger	Trigger pull 1,650g (3lb. 10 oz.)
Barrel selector	Selection of the preferred shot sequence, conveniently placed in front of the trigger
Wood grade	Standard: 3 Optional (extra cost): Grade 4 wood

Drop	Standard: 38/50mm (1.50"/2") (Sporting stock) Optional: 38/56mm (1.50"/2.20") (Game stock)
Offset	3/6/8mm (0.12"/0.24"/0.31")
Pitch	84°
Stock length	375mm (14.37") incl. recoil pad
Butt plate	Blaser Comfort recoil pad
Fore-end	English Style
Balancer	Prepared for barrel balancer (weights not included). Balancer in stock
Weight	Approx. 3.4 – 3.8kg (7lb. 8 oz. – 8lb. 6 oz.)
Accessories	Incl. ABS travel case

Optional left-hand stock, butt stock with adjustable comb and Game stock (38/56 mm)

Length-adjustable trigger blade on the F16 Sporting.

Butt stock with adjustable comb (optional).

The F16 Sporting has a balancer incorporated into the stock and is fitted to allow for optional barrel balancer weights, so the shooter can adjust their shotgun according to their needs.

F16 INTUITION

Ladies only! With the lowest profile receiver in its class, the F16 forms the ideal basis for a shotgun that is perfectly tailored to the needs of the huntress – both for hunting and clay shooting.

Thanks to reduced pitch angle and slender pistol grip the optimized Monte Carlo stock rests naturally in the shoulder and insures positive trigger control. Shooting becomes more comfortable. The F16 Intuition versions boost self-confidence and lead to natural intuitive shooting. Huntress and shotgun instantly become one.

The F16 Intuition is available as F16 Game and F16 Sporting.

F16 Intuition Stock

A newly designed Monte Carlo shape provides the huntress with optimum target acquisition. With a stock length of 350mm, it insures the perfect fit from the first shot. The benefits to the huntress are clear: she can comfortably rest

her face against the stock to get into the optimal shooting position. Due to the shorter stock the distance between the pistol grip and trigger as well as the distance between the butt plate and trigger is reduced. The pistol grip now

boasts finer features to easily accommodate a smaller hand reducing the risk of flinching. Shooting becomes more comfortable. Huntress and shotgun become one.

F16 HERITAGE

F16 Sporting Heritage with leaf arabesques and fine English Scroll.

F16 Heritage

Fine leaf arabesques lavishly worked into traditional “Basso relief” adorn the stylish long side plates of the F16 Heritage. This elegant shotgun can be combined upon request with game scenes or fine English

Scroll. Its stock is made of finest selected grade 8 walnut wood that has slowly grown in the high altitude of the Caucasus. The F16 Heritage is available in a Game or Sporting version.

F16 GRAND LUXE

F16 Sporting Grand Luxe with game scene framed in leaf arabesques: pheasants on the left side, ducks on the right side.

F16 Grand Luxe

Elaborate leaf arabesques worked into traditional “Basso Relief” decorate the receiver of the F16 Grand Luxe. Upon request they can be complemented by English Scroll or game scenes.

The selected Caucasian grade 6 walnut wood rounds off its elegant appearance. The F16 Grand Luxe is available in a Game or Sporting version.

F3

THE SHOTGUN THAT ANSWERS TO THE HIGHEST DEMANDS

In competition the F3's technical superiority will out perform all others. When hunting the F3's outstanding pointability and balance will be no match for any game. Regardless of the setting, the F3 brings new meaning to intuitive shooting through ergonomics and technology.

CONCENTRATION AND SAFETY. INTUITION AND BALANCE.

Triplex® Bore Design

Three construction characteristics combine to provide optimized muzzle velocity, a homogeneous shot pattern and help dampen recoil:

- Innovative, extremely flat forcing cone with an angle of 2.5°. The shot stream passes into the cylindrical barrel as smoothly as possible with minimal deformation and without any dangerous increase in pressure
- "Overbore" internal diameter of 18.65mm (0.735")
- 12/76 gauge with additional steel shot proofing

Strengthened shot

The F3 has been designed for the use of steel shot and is officially certified as such. (Magnum proofed with additional steel shot proofing).

Blaser Balancer

The Blaser balancer system makes it possible for the F3 to be flexibly adapted to every shooter and any shooting style: swing-through, pull-away, maintained-lead or move-mount-shoot.

The Blaser competition balancing system consists of two components. It comprises a stock balancer and barrel balancer. The stock balancer is a threaded rod that can be fitted with one or four moveable weight cylinders. The barrel balancer allows you to add up to an additional 170g to the gun.

Blaser EBS® – Ejection Ball System

The EBS® system activates the ejectors when a shot is fired and cocks them when opening the gun. The ejector springs are always decocked when the gun is stored in order to prevent spring fatigue. Resistance when closing the gun is always kept to a minimum, whether the ejectors were previously activated or not.

Blaser IBS®: Anti-Double System

The Inertial Block System (IBS®) prevents manual fan firing or doubling (the unintentional firing of a second shot). Many conventional single trigger systems use solutions that are detrimental to the ideal trigger-pull weight or trigger characteristics. Thanks to IBS®, the F3 trigger combines the highest possible level of safety with first-class trigger characteristics.

Optimal Hinge Operation

The exceptionally soft barrel closure also helps the shooter to keep their concentration exclusively focused on the target before taking the shot.

Linear Guidance of Firing Pin

The linear guidance of the striker and firing pin allows for the best possible transfer of kinetic energy and thus lightning fast ignition.

Solid Locking Wedge

The solid locking wedge combines a generous locking surface in combination with a locking plate at the bottom of the action to provide the highest level of locking safety.

Minimal Strain on the Locking Mechanism

Strain on the locking mechanism during shooting is exceptionally low thanks to the optimized geometry of the low positioned bore axis and the high positioned hinge pin. As a result the F3 is designed to last a lifetime.

Blaser F3 trigger

The F3 trigger transforms your thought impulse into ignition within a millisecond of time. But why is this lock time so critical in shooting? The shorter the lock time the more accurate the shot will be. Along with the fast lock time you must have optimal trigger control. The F3 trigger breaks as crisp as glass at 1,400g with an extremely short length of travel. This ideal combination allows the shooter to realize his full potential without any delay in firing the shot. The barrel selector is conveniently located in front of the trigger and is marked for identification. The purely mechanical selective single trigger operates independent of recoil. The trigger blade can be adjusted for a customized length of pull to insure ideal finger placement.

Create your individual F3!

F3 COMPETITION

Ideal for a variety of competitive disciplines, including Sporting, Compak Sporting and Olympic Skeet shooting. All competition barrels can be used with the barrel balancer system and are almost identical in terms of weight, balance and swing characteristics. The sporting stock with pistol grip and palm swell encourages a relaxed hand position during target acquisition.

The F3 Competition with optional grade 7 wood

Gauge	12/76; 20/76; 28/70; .410
Barrel	71 cm, 76 cm or 81 cm (28", 30" or 32")
Firing	Reinforced firing with additional steel shot test
Sight	HIVIZ® shotgun bead kit
Chokes	Blaser Interchangeable Chokes Flush to Muzzle: Skeet (SK), 1/4 (IC), 1/2 (M), 3/4 (IM) and 1/1 (F) incl. choke key and choke box for 5 chokes
Receiver	Matt black action, with other versions available
Trigger	Length adjustable, trigger pull 1,400 g (3lb. 1.38 oz.)
Barrel Selector	Selection of the preferred shot sequence, conveniently placed in front of the trigger
Wood Grade	Standard: 5

Drop	
Offset	
Pitch	Available stock versions see page 228
Stock length	
Butt plate	Slip-on rubber recoil pad
Fore-end	Fore-end English Style; optional Semi-Beavertail fluted or Schnabel
Balancer	Barrel and stock balancer
Weight	From approx. 3.6kg (7lb. 15 oz.)
Accessories	Interchangeable bead kit ABS-Case
Optional left-hand top lever and left-hand stock	

F3 "VANTAGE"

The youngest member of the F3 family offers shooters faster target acquisition and noticeably less neck and shoulder strain thanks to a combination of a significantly higher rib and a perfectly coordinated stock. The flat ramp angle also extends the shooter's peripheral vision, regardless of the height of the clay and the angle to the target.

The F3 "Vantage" with optional grade 6 wood

Gauge	12/76; 20/76
Barrel	76 cm or 81 cm – "Vantage" Barrel Mid Rib (30" or 32")
Firing	Reinforced firing with additional steel shot test
Sight	HIVIZ® shotgun bead kit
Chokes	Briley Interchangeable Spectrum Extended: Skeet (SK), 1/4 (IC), 1/2 (M), 3/4 (IM) and 1/1 (F) incl. choke key and choke box for 5 chokes
Receiver	Matt black action, with other versions available
Trigger	Length adjustable, trigger pull 1,400 g (3lb. 1.38 oz.)
Barrel Selector	Selection of the preferred shot sequence, conveniently placed in front of the trigger
Wood Grade	Standard: 5

Drop	
Offset	
Pitch	Available stock versions see page 228

Butt plate	KickEez® rubber recoil pad
Fore-end	Fore-end Semi-Beavertail fluted; optional English Style or Schnabel
Balancer	Barrel and stock balancer
Weight	From approx. 3.8kg (8lb. 6 oz.)
Accessories	Interchangeable bead kit ABS-Case
Optional left-hand top lever and left-hand stock	

F3 SUPERSPORT

The F3 Supersport is the specialist choice for F.I.T.A.S.C., English and American Sporting shooters and is also becoming an increasingly popular choice for successful Olympic Trap competitors.

The F3 Supersport with the optional grade 7 wood and fore-end Schnabel

Gauge	12/76; 20/76;	Drop	
Barrel	Supersport barrels: 76 and 81cm (30" and 32") set in the factory to a pattern 70:30 (sighting plane "figure 8")	Offset	
Firing	Reinforced firing with additional steel shot test	Pitch	Available stock versions see page 228
Sight	Mid bead and front bead	Stock length	
Chokes	Briley Interchangeable Spectrum Extended: Skeet (SK), 1/4 (IC), 1/2 (M), 3/4 (IM) and 1/1 (F) incl. choke key and choke box for 5 chokes	Butt plate	KickEez® rubber recoil pad
Receiver	Matt black action, with other versions available	Fore-end	Fore-end Semi-Beavertail fluted; optional English Style or Schnabel
Trigger	Length adjustable, trigger pull 1,400 g (3lb. 1.38 oz.)	Balancer	Barrel and stock balancer
Barrel Selector	Selection of the preferred shot sequence, conveniently placed in front of the trigger	Weight	From approx. 4.0kg (8lb. 13 oz.)
Wood Grade	Standard: 5	Accessories	Incl. ABS-Case "Supersport"

Optional left-hand top lever and left-hand stock

F3 SUPERTRAP

The harmonious combination of total length, balance and weight distribution makes the F3 Supertrap the ideal companion for champions, whether as an over/under (OU), Under-Single (USGL) or an F3 Supertrap Combo (OU + USGL) version. Thanks to the large adjustment range of the rib, demanding trap shooters can use the F3 to its full potential and adjust the shot placement by raising or lowering the rib according to their individual requirements.

The F3 Supertrap Under-Single with optional grade 6 wood

The F3 Supertrap over-and-under Standard with optional grade 6 wood

Gauge	12/76; 20/76 (O&U) 12/76 (USGL)
Barrel	Supertrap barrels: OU barrel 81cm (32"): set in the factory to a pattern of 70:30 (sighting plane "figure 8") USGL barrel 86cm (34"): set in the factory to a pattern of 85:15 (sighting plane "figure 8")
Firing	Reinforced firing with additional steel shot test
Sight	Mid bead and front bead
Chokes	Briley Interchangeable Spectrum Extended: Skeet (SK), 1/4 (IC), 1/2 (M), 3/4 (IM) and 1/1 (F) incl. choke key and choke box for 5 chokes
Receiver	Matt black action, with other versions available

Fore-end rest

Butt stock rest

Rotatable pistol grip

1 | Blaser Carbon Shooting Stick 2.0

The Blaser Carbon Shooting Stick 2.0 sets new standards. Thanks to the well thought-out optimizations, the shooting stick is not only the ideal solution for a precise shot in difficult conditions, but also even more comfortable to use. The patented pistol grip, which allows the rifle to remain safely on target over a lateral range of 20 meters (referred to 100 meters shooting distance), is unchanged. However, the fore-end rest, which is located on the pistol grip where the rifle rests is reliably fixed with a new safety slide. The rifle can also be directly attached to the fore-end rest with the bipod attachment.

2 | Blaser Carbon BiPod The Blaser Carbon BiPod is the perfect assistant for ensuring a certain hit when shooting lying on the ground. Thanks to the lengthwise adjustment of the legs up to 30cm useful in nearly every terrain.

2 | Blaser Hunting-Jagdrucksack in robust, quiet and tear-resistant original hunting linen. Volume: approx. 35l, BxH: approx. 60x55 cm

3 | Blaser Ultimate Daypack Whether it is hunting in the mountains or stalking – with this versatile hunting rucksack you will master every challenge. Volume approx. 20l, weight approx. 1.6 kg, LxWxH: approx. 55x27x20 cm. Available in brown and Blaser HunTec Camo.

HUNTING SUCCESSFULLY WITH THE PERFECT EQUIPMENT

Not only an eyecatcher but made-to-measure for your needs on the high seat. Loden and leather are aesthetically combined in these practical accessories. Just a little everyday luxury.

1 | Blaser Shooting Pillow Whether in a high seat or on a shooting range: The Blaser shooting pillow is your perfect support for accurate shooting. **2 | Blaser Silencer Cover** The Blaser silencer cover boasts an elegant loden design with leather trims giving every rifle with a mounted silencer a harmonious overall appearance. At the same time, it avoids disturbing noises when carrying the firearm on the hunt. **Large (for Blaser Over-Barrel)** Ø 47-52 mm, 245 mm length **Small (for Blaser On-Barrel)** Ø 38-45 mm, 195 mm length; Material: Neoprene, loden imitation (60% wool, 40% polyester), leather inlays, PU. **3 | Blaser Cordura Cartridge Pouch** Versatile, durable, handy – the new Blaser cartridge pouch is made of robust Cordura and accommodates up to 12 rifle cartridges.

1-3 | Also available in Blaser HunTec Camo.

4 |

5 |

4 | Blaser sitting pad loden leather Foldable and compact. This sitting pad (40x35 cm) is soft, robust and space saving. With the practical loop with push button, the pad can be attached to your belt within seconds. **5 | Blaser Heatpad** Never be cold again. The Blaser Heat Pad ensures that you do not freeze when sitting game in winter. The high-performance power bank (10,000 mAh) which is integrated in the zipped side pocket provides comfortable warmth for up to eight hours. The Blaser Heat Pad can be rolled and stowed compactly in the supplied bag. The seating size is 35x40cm.

PROFESSIONAL GAME RECOVERY

2 |

3 |

1 | Blaser Folding Game Bag Folding, extremely robust game bag in waterproof material for easy transportation of harvested game. Large capacity. Adjustable-length handles can be used as grips or practical shoulder straps. WxHxD 60x40x40 cm. **2 | Blaser Game Hauler** Helpful, practical strap for recovering game in difficult terrain. The variable rope with swivel snap can also be used for bleeding out in conjunction with the extremely strong stainless steel hook. Includes two bird totes for easy transportation of harvested small game. **3 | Blaser Ultimate Knife** With a rotating blade and an accurately fitting Kydex sheath. The break-open blade with a bulged tip ensures that the game is broken open cleanly, in particular preventing injury to the rumen.

RELIABLY CONNECTED

4 | Blaser rifle sling "Carbon" The Blaser rifle sling in carbon looks is a stylish eyecatcher and can easily be attached to the rifle thanks to the Blaser quick lock fasteners. **5 | Blaser rifle sling "Loden/Leather"** The new Blaser rifle sling captivates with finest cowhide leather and elegant loden in dark grey. **6 | Blaser rifle sling "Tracking" dark-green** High-quality rifle sling in dark green neoprene. Non-slip, elastic and length-adjustable with practical tracking clasp on rear stock. **7 | Blaser rifle sling "Neopren®"** Adjustable, elastic rifle sling made of anthracite Cordura (available in green and Blaser HunTec Camo). **8 | Blaser rifle sling "Leather"** Stylish rifle sling made of brown leather. **9 | Blaser rifle sling "Monza Edition"** A comfortable rifle sling made of leather and Cordura with a soft, wide shoulder pad for maximum comfort. Matching to the R8 Monza.

8,5x55 BLASER – MAXIMUM POWER FOR SHORT BARRELS

Rifles with silencers are gaining more and more importance. In order to keep the firearm as compact as possible with a silencer, short barrels are the perfect choice. Especially for this reason, Blaser has developed the caliber 8.5x55. Even with barrel lengths of less than 50cm, it reaches ideal ballistic values that are normally only achievable with use of longer barrels for high-performance calibers.

8.5mm bullet diameter with 10.4g, 11.7g and 13.6g bullet weight, together with a high bullet velocity provides the best possible effect as well as a very long trajectory. These features make the 8.5x55 Blaser a caliber with an incredibly wide field of use; ranging from local hunting territories to hunts for moose or large antelopes.

The R8 Ultimate Leather with Blaser
Over-Barrel silencer and barrel length 580mm.

A barrel shortened by 11cm results
in a minimal loss in performance

The R8 Ultimate Leather with Blaser
Over-Barrel silencer and barrel length 470mm.

CAUTION: Fire or blast hazard and hazard of fragment projection. Keep away from hot surfaces, sparks, open flames and other sources of ignition. No smoking.

BLASER CDC – ENVIRONMENTALLY RESPONSIBLE: LEAD FREE

More than 30 years ago, Barnes (today one of the world's most renowned bullet manufacturers) put a lead-free copper hunting bullet on the market. The goal was to provide a bullet with consistently good expansion qualities and – at the same time – improve ballistics.

The Blaser CDC (Controlled Deformation Copper) bullet combines all these desired qualities in the optimum way, including excellent accuracy and superior knock-down effect. CDC is specifically adjusted for light to medium game, meeting the needs of hunters in Central Europe perfectly. CDC is designed and field-tested by Blaser. In order to ensure the highest quality possible, CDC bullets are manufactured by Barnes and loaded by Norma.

Compared with other brands of lead-free bullet, the weight of the Blaser CDC bullet has been only slightly reduced from those containing lead. This has been done deliberately, to ensure the CDC's excellent controlled bullet performance over a wide range

of distances and velocities. Thanks to the heavier weight, CDC bullets offer outstanding penetration and excellent stability.

The CDC's bullet tip reacts immediately on impact due to its special design consisting of an innovative expansion cavern, pressure grooves and a polymer tip. On penetration, CDC forms four separate petals, preventing fragmentation and meat damage.

Thanks to its weight, the CDC projectile provides consistently good deformation over a large range of distances.

 **CAUTION:** Fire or blast hazard and hazard of fragment projection. Keep away from hot surfaces, sparks, open flames and other sources of ignition. No smoking.

BLASER CDP – BEST EFFECTS WITH LEAD

As a result of the controlled deformation process (CDP) the CDP projectile ensures a powerful shock effect and high penetration force while its weight remains virtually the same.

Despite its relatively low weight, the CDP bullet produces the optimum exit wound while causing minimum meat damage. Upon impact, the CDP bullet mushrooms symmetrically in four directions. Regardless of varying velocity and target resistance, the deformation process always remains controlled. When mushrooming, the diameter of the bullet increases by 2.5 times. This effect has been achieved by accurately calculating the behaviour of the bullet components during the shot.

Extensive testing over hundreds of shots in the field showed the following results:

- in 78% of cases, the quarry ran less than 20m following a hit
- in 94% of cases, very low meat damage was reported.

The tip of the projectile consists of a soft alloy that reacts dynamically.

Four internal grooves along the length of the bullet, set at 90 degrees, control the symmetrical deformation process.

The increasing thickness of the sleeve towards the rear supports controlled expansion.

The V-shaped closed bridge is robust yet flexible. To a large extent, the forces that affect the projectile in the barrel are absorbed. The bridge gives the projectile reliable protection against decomposition and provides optimal interior ballistics.

The hard rear core promotes penetration performance and ensures that the projectile retains close to 100% of its weight.

BLASER MAGNUM – THE HIGH-PERFORMANCE CALIBER FOR LONG-RANGE SHOTS

In cooperation with Norma, Blaser has developed a brand-new and completely original generation of high-performance cartridges. The latest ammunition technology was applied to achieve optimum performance in each caliber group.

High Accuracy with Good Shooting Characteristics

High precision values in conjunction with notably increased energy and velocity data make the Blaser Magnum calibers your best choice for long-range shooting – whether you are hunting in the mountains, in the savanna or on a plateau.

Thanks to an optimized cartridge geometry, a stable cartridge base and modern powder types as well as the four-groove barrel profiles and adapted twist rates, the Blaser Magnum offers a more comfortable recoil than other Magnum cartridges.

Four Calibers, Six Loads

The Blaser Magnum calibers are available with Hornady Interlock, Nosler AccuBond, Barnes TSX/TTSX and Blaser CDP bullets. Norma also offers additional loads under its own company label.

*The range of Blaser Magnum cartridges from left to right:
7mm Magnum with Hornady Interlock bullet; .300 Magnum with TTSX bullet;
.300 Magnum with CDP bullet; .338 Magnum with Nosler AccuBond bullet;
.338 Magnum with Barnes TTSX bullet; .375 Magnum with Barnes TSX bullet*

Dream Destinations all Over the World

“Quality before quantity! We only suggest hunting areas to you that we have experience of, areas in which we have hunted several times. We work exclusively with outfitters whose first responsibility is to the wildlife, and whose understanding of hunting is in line with ours: fair chase and sustainability.”

Namibia

Sney Rivier Lodge

Hunting fever can affect everyone: whether you are carrying a camera, binoculars or a rifle, being near wild game will send your pulse racing!

Experience the unique flair of Sney Rivier Lodge, which is just a two hour drive from Windhoek airport. In a breathtaking landscape, you can hunt on more than 20 game species, exclusively while stalking on foot. Thanks to a wide range of leisure activities, non-hunting partners will surely also enjoy the stay.

Situated in the landscape at the base of the Khoma Highlands, Sney River Lodge enjoys a unique ambience. The architecture and design of the lodge is inspired by nature and hunting. The boundaries between inside and outside are blurred. Within view of the main house and the guest chalets is a watering hole where game can be observed all day long.

The lodge is the ideal destination for both the experienced African hunter as well as for those hunting on the continent for the first time. The trip will be an unforgettable experience for the rest of the family, too. From the generous breakfast buffet to delicious dinners, the chefs are always able to surprise with a combination of traditional African and modern international cuisine.

Sney River Lodge pampers you with the highest levels of luxury, while being in the middle of the Namibian bush. The lodge was rebuilt in 2009 based on the concept of combining exclusivity with thrilling hunting in the wild.

Hunting challenges are guaranteed to be found on the 40,000 hectares of hunting grounds, be it tracking wild game and stalking to within range of your quarry or sitting in a hide on one of the countless rocky hills. Our hunting guides and trackers are masters at helping you, the hunter, succeed. As excellent connoisseurs of flora and fauna, they are able to show you some of the most extraordinary natural wonders in Namibia.

You will be treated to the most amazing spectacles during every season of the year and at any time of day. Every stalk is worthwhile, every stalk will bring its own surprises. Hunting is done exclusively on foot.

Endless plains and a varied landscape always impress visitors from Europe, as Namibia is only sparsely populated and largely untouched. It counts among the most bio-diverse countries on the planet.

What could be more beautiful than bringing the hunting day to a close beside a campfire enjoying your favorite beverage and bite to eat. Find yourself reminiscing about the days adventure while being pampered by our friendly attentive staff. At least until the drums call you to another highlight: the dinner, where a wide variety of game cuisine is featured.

Hungary

Europe's Hunting Paradise

Hungary offers a unique variety of hunting opportunities with red deer, roe deer, mouflon, fallow deer and wild boar all available. The country's exceptional game stocks and its hospitable people attract numerous visitors who come to enjoy Hungary's large selection of national hunting areas and comfortable hunting lodges.

Hungary is a fantastic country to hunt roe deer, which can be found in both the east and the west. Strong bucks are mainly found in eastern Hungary, where you can choose between stalking and high seat hunting. In western Hungary, with its extensive hunting areas, there is also excellent roe buck hunting to be had.

Since the start of the 20th century, Hungary has also been renowned for its classic small game hunting (driven or stalking). Hunters from across the globe visit the Hungarian lowlands in the east of the country every year.

Hungary

Red Deer Rut

Nowhere else in the world you can traditionally hunt on such enormous stags as during their fascinating rut. The noblest of our game species is nurtured with great care here in Hungary where its natural habitat is still spacious enough. For most hunters the red deer rut is the biggest highlight of their hunting year. Especially in our Hungarian national hunting areas rangers work towards the rut the whole year through and thus make hunting on all classes possible.

Driven Hunts

Experience the famous and perfectly organized driven hunts in the hunting areas of Hungary which are extremely rich in game. Not only big boars, but also the many different game species and the large hunting bags attract numerous hunters every year again to go hunting in highly traditional Hungary.

Hungary

Mouflon and Fallow Deer

Hunting mature mouflon rams in the indigenous and hilly oak and beech forests of Hungary is particularly exciting.

Hungary is world-renowned for being one of the best hunting countries for big fallow stags: from interesting stags to be shot over abnormal stags to world record class.

Sambia

A Hunting Jewel

The Game Reserve lies in the world-famous Luangwa Valley and stretches from the North Luangwa National Park to the Luangwa River.

The area covers 200 square kilometres of Miombo woodland, savannah and rugged mountains.

Due to the varied habitats, an astonishing variety of species can be found in Nyaminga, including: leopard, buffalo, Chobe bushbuck, crocodile, elephant, grysbok, hippo, kudu, oribi, puku and Cookson gnu.

Cameroon

For Connoisseurs and Specialists

Hunting in the rainforest and in the savanna: All safaris are run on a one-to-one basis, and each hunting guest is escorted by a professional hunter with their own individual hunting vehicle and a team of trackers and bearers.

The first and last day of your scheduled trip are usually spent travelling, so for a 16-day safari, you can enjoy 14 full hunting days.

We offer safaris in five camps: Mayo Oldiri, Mayo Nduell, Djibao, Mayo Vaimba and Rey Bouba.

Tanzania

In Hemingway's Footsteps

A story of incomparable encounters: Tanzania is without doubt one of the most famous and exclusive safari destinations in Africa. Inyonga East, Kilombero Valley, Maasailand and Selous are the perfect examples of what Tanzania has to offer: unparalleled variety of wildlife and breathtaking views.

South Africa

Africa's Diversity

We have hunting opportunities in several different areas, allowing us to tailor-make safaris according to your needs!

Safaris are run in South Africa throughout the year, with the best hunting opportunities between April and October.

Around 40 different species of game can be hunted throughout the country, and each safari is carefully planned by us to suit your wishes. Safaris in South Africa are suitable for the whole family and for the non-hunters in the party; there are a variety of interesting photographic tours.

Mozambique

Buffalo Fever in the Zambezi Delta

Mozambique, in southern Africa, offers you the chance to experience wilderness unchanged for millennia. This is one of the greatest hunting countries on the globe: There are areas where no trophies have been taken for 16 years.

The hunting area is part of the Marrumeu complex and lies in the centre of Mozambique. It borders the mighty Zambezi river and has an area of approximately 200,000 hectares.

Zimbabwe

In Colonial Style

Hunting in Zimbabwe is done with our partner in the Matetsi region in the west of the country. These areas are the Kazuma/Pandamasuie Forest area which borders the Kazuma Pan and the Zambezi National Park.

Other hunting areas are near the Fuller Forest and further south in the Ngamo forest areas. None of the areas are fenced, so the game is all free-range, and they vary in size from 30,000 to just over 102,000 hectares.

The hunting areas named here are known for their very good game populations, with mature trophies for big game and plains game.

The hunting season runs from April to October; the most popular period for hunting is from June to August.

Mauritius

Hunting on the Island of Your Dreams

Experience a dream holiday on the Indian Ocean and exciting hunting: If you suggest Mauritius as a destination, you'll find it won't be too difficult to persuade your partner to come with you for a hunting holiday. After all, where else in the world can you combine a relaxed beach holiday with hunting?

White sandy beaches, a crystal clear sea, exclusive hotels under palm trees and spectacular nature make Mauritius a prime destination. Only very few hunters realize there are amazing hunting opportunities in this magical place. Rusa deer, part of the crested deer family, and wild pigs were introduced by the first sailors to the islands as a source of meat. Today, these two species are controlled by hunting. Hunting, deep-sea fishing and beach holiday: the perfect, varied combination.

Australia

The Fascination of Down Under

Hunting is a special experience in Australia, and will surprise even the most experienced and well-travelled hunters. Along with water buffalo, which our partner specialises in, you can also hunt banteng and wild boar.

The hunting takes place in the best and most remote area of Arnhem Land, where Australia's nature and wilderness are untouched. Accommodation is in comfortable tented camps near the hunting areas.

New Zealand

At the Other End of the World

This truly is one of the most impressive hunting areas in one of the most beautiful countries in the world. Exceptional examples of game species and fantastic landscapes have established New Zealand as one of the destinations for the globetrotting hunter.

Conscientious management and a limited number of hunts ensures the highest quality of this outfit and helps to preserve it from season to season.

Tours and packages are tailored individually to each hunter or group and can contain other summer and winter activities. Whether you like sightseeing, a helicopter flight to a private boat with an overnight stay deep in the heart of the fjords, or a day of heli-skiing in the southern mountains – Minaret Station can satisfy any wish you might have.

Your accommodation is a comfortable lodge in the hunting areas, from which you have magnificent panoramic views across the beautiful landscape. The area is mountainous and the town is named after Lake Wanaka, the fourth largest inland lake in New Zealand.

Argentina

In the Land of the Gauchos

Argentina is one of the top destinations for hunting and fishing worldwide. With its varied climatic zones and regions, it offers many opportunities for foreign hunters.

The plains in the Buenos Aires province, the Patagonian mountains and the La Pampa province provide a large range of local and exotic game species.

The seasons are the reverse of our European dates: the red deer rut takes place from March to April, which is the main hunting season. Other game species can be hunted from March to November.

Species include red deer, buffalo, fallow deer, blackbuck, four-horned sheep, axis deer, peccary, mouflon, Pampa goat, puma, wild boar, wild sheep and of course small game.

Canada

Every Hunter's Dream

Who hasn't dreamed of following in the footsteps of Jack London and hunting in the north of Canada? There are crystal-clear lakes and rivers, the lonely and endless expanses and the stunning colors of the Indian summer, which see the start of the hunting season in early autumn.

You'll stay in remote cabins, where you'll forget time and the worries of everyday life.

While hunting you'll find your breath taken away by the beauty, and be surprised by the huge moose bulls that appear as if from nowhere.

Canada's northern provinces of British Columbia, Yukon and the Northwest Territories have been spared from the effects of civilisation, making them the ideal terrain for a hunting trip. The far north offers you the original and genuine wilderness of Canada.

The north of Canada offers you much more than just moose for hunting. August is ideal for a very demanding Dall sheep hunt, or to pursue snow goats. The stalks for old caribou bulls starts in the high valleys in September, while the moose rut starts in the middle of that month. There is always the chance that a wolf might present itself, which gives each hunting day the possibility of a chance encounter.

In the Arctic spring between the start of March and the middle of May, there is the opportunity to hunt Polar bears on Baffin Island. Hunting on the “eternal ice” is one of the most extraordinary hunting experiences of them all.

Blaser Safaris organizes hunts in British Columbia, Yukon, Northwest Territories, Nunavut and Newfoundland.

Alaska

Rough Coasts & Strong Bears

A successful hunt is only possible with plenty of opportunity, and more bears mean more opportunities. Admiralty Island, situated in the middle of the inside passage of Alaska's wild coast, boasts the largest density of brown bears per mile.

Enjoy the natural beauty of Alaska against a stunning backdrop. It is not uncommon to see whales, eagles, seals, sea lions and a number of other animals. All trips include fishing and you will be treated to a special delicacy during your trip if it's available: fresh Alaskan crab and prawns.

A superbly equipped yacht provides you with comfortable accommodation, and you'll be travelling along the most remote stretches of coastline, using a rubber dingy to approach the areas that have the greatest promise for success.

The chance of bagging a really substantial coastal brown bear is unusually high here, and there is also the possibility of hunting wolves and black bears.

Vancouver Island

Wilderness & Civilisation

Vancouver Island boasts a unique combination of stunning coastal landscapes, rain forests, fjords, mountains, and the metropolitan flair of British Columbia's capital, Victoria. This is one of the key attractions of hunting in one of Western Canada's most spectacular regions.

Spring is one of the best times to hunt black bears. Numbers on Vancouver Island are high, so that there is always a good chance to bag a substantial animal. Hunts are exclusively by stalking from boats and on foot and feeding areas are avoided. Due to the mild climate, hunting starts at the beginning of April.

Greenland

Welcome to the Ice Age

Hunt on musk oxes and feel set back in prehistory. Greenland is the largest island in the world and is blessed with vast, unspoiled hunting grounds on a scale that many can only dream about.

Depending on the weather, four hunting days are normally enough to guarantee success. An autumn hunt is highly recommended and the season runs from the end of August to the start of October when temperatures hover around 0°C and are still bearable.

If, however, you want to experience the fascinating world of eternal ice and are not put off by temperatures below -30°C, hunting in March and April can make your long-held dream come true.

North Canada

Nunavut – North of the Arctic Circle

In the nearly two million square kilometers of Nunavut territory in the Canadian North, it is possible to experience one of the most pristine and breathtaking hunts. Those who have traveled the land of the midnight sun, north of the Arctic Circle, using sled dogs have gained insight into the ancient hunting culture of the Inuit and are changed forever. It is one of our planet's last real hunting adventures. The commercial hunt for caribou, musk ox, polar bear and walrus furthermore represents one of the Inuit's few sources of income all the while managed under government regulations and hunting quotas to ensure absolute sustainability. Regardless of where you hunt now this will prove to be one of the most unique hunting expeditions of your life; experience the high north.

Sweden

Vast Country in the North

Sweden abounds with traditional game that will give visiting hunters a very special experience. Moose, black grouse and capercaillie are among the first species that spring to mind.

The methods of hunting are no less fascinating, with dogs playing an important role on both group and individual expeditions.

The sparsely populated hunting areas mean that you really do experience the feeling of wilderness. Hunting here takes place in groups using dogs. Due to the size and wild nature of Sweden's hunting areas, a certain level of physical fitness is required.

Finland

Hunting among Friends

In Finland you find a beautiful landscape and very friendly people. Finland offers the hunt on white-tail, moose, grouse species like black grouse as well as capercaillie. Whitetails are mostly hunted from the high seat. This can last until the late evening – especially in the snow this is a unique experience! Hunting moose takes place individually on the high seat or as a driven hunt: You may hunt bulls, cows and calves. The traditional nordic hunt on variable grouse species in the snow is hunting them in the treetops with the elkhound – either with a snowmobile or on skis.

Estonia

Indian Summer & Strong Moose

Hunting in the colorful Estonian forests in fall is a special experience. When the leaves turn from green to red, yellow and bright orange the northernmost, Baltic country invites hunters to hunt the Estonian elk.

The hunt is a combination of sitting and stalking from the middle of September till the end of October – and the hunt on stag, roe deer and wild boars can be combined, too. Due to the large contiguous forests for larger distances you need to go by car.

Siberia

Russian Treasures

Our Russian partner's sporting area boasts a rich ecosystem and covers 150,000 hectares, making it ideally suited for hunting. Roebuck stalking is a particular speciality, with the rut lasting from the middle of August to mid-September.

Accommodation is in a well-equipped hunting lodge with a view of the lake, which is a mere two minutes' walk away. Guests can enjoy WiFi, a jacuzzi, and sauna.

British Isles

Moors, Heather and Hills

Scotland

Hunting red deer in the Scottish Highlands is an almost legendary experience. With their deep valleys, steep slopes, crystal-clear rivers and lochs, the Highlands of Scotland have qualities of solitude and remoteness that are found almost nowhere else in Europe. Here you can stalk red deer all day long, and trophy fees are not high. Memorable hunts are experienced by the skill and fitness of the hunter and his guide rather than the size of his wallet.

England

The rolling fields of rural England provide a magnificent backdrop to some excellent stalking. Roe bucks are in season from the beginning of April, and chances of getting a fine example are particularly high in the south of the country. The prime time is August, when their rut begins. One of the attractive things about English deer hunting is that most of it is done by stalking.

Ireland

Ireland is known as the “Emerald Isle”, due to the lush green nature of its wild romantic countryside. Hunting sika deer here is a very special experience. During the rut from the end of September, you can hear the shrill whistles of the “black devils” almost all day long in the remote high valleys. This gives you a wonderful sense of freedom from worldly cares as you set off in search of sika, which can be very large here. Stalking wild goats also presents a very exciting yet cost-effective way of hunting in Ireland.

Spain

In the Land of the Ibex

Four renowned regions – four different types of ibex: Spain has a very long hunting tradition and especially good stocks of game.

Hunting for ibex is its crowning glory – and there are four different sub-species on the Iberian Peninsula. The Gredos ibex is found in the Sierra de Gredos, which lies around 200 km west of Madrid. It is the most well-known of the four species. The others are the Beceite ibex, from the Beceite mountains north of Valencia; the Sierra Nevada ibex from Andalusia; and the Ronda ibex from the Ronda mountains in Andalusia. All four species are highly desirable trophies.

Spain is known for its wild, open mountain landscapes and old, tranquil villages nestled on their slopes. Importantly, its pleasant and temperate climate is also ideal for hunting. The hunting season for all four ibex species runs from October to the end of May. Hunting during the rut from the middle of November to the middle of December is highly recommended, or from April when bucks group together in small packs.

Along with ibex, Spain also offers opportunities for combined hunts, having good stocks of red and fallow deer, chamois and aoudad sheep in its various regions.

Romania

The Pearl of Eastern Europe

Romania has huge potential as a destination for passionate hunters – all the hunting takes place in unspoiled countryside. Species include red and roe deer, wild boar and chamois. In addition, our guests enjoy excellent accommodation and service.

From the Carpathian Mountains to the Danube Delta – all types of habitats can be found: high alpine terrain, hills, plains, lakes, as well as marshes along the Danube and the Danube Deltas.

The quarry's habitats are partly untouched forests. In Romania you create unforgettable memories.

Bulgaria

Green Hills & Black Sea

We hunt in two completely contrasting Bulgarian territories. Our guests hunt in Kormisosh, a very mountainous state area in the Rhodope Mountains, on strong stag with a possible antler weight of up to 10 kg. Especially in combination with the chamois hunt, this territory is unique. Our second destination in Bulgaria is Palamara: a state area at the Black Sea. It is THE area for impressively strong stag. During the rut we hunt stag with antler weights from 9 to 13 kg every year.

Serbia

Large Hunting Culture

Serbia is a country with an ancient hunting tradition. Either hunting roebucks in spring in the famous Voivodina or in the summer months during the rut, it is always an unforgettable experience for our guests. You can hunt in popular territories like Subotica, Kanjiza, Novi Knezevac and Kumane. In top areas like Bascki Monostor, Apatin and the Serbian inland in Pancevo you can hunt on impressive stag during the rut.

Croatia

Hunting with a Sea View

Croatia offers a unique combination of broad hunting opportunities with a Mediterranean flair. It is a lifetime experience to shoot mouflon or chamois in the rugged and rocky „karst area“ along the picturesque Dalmatian coast. Enjoy the sea view and the cordial hospitality of the people. In the inland of Croatia, near Rijeka, an adventurous hunt on bear awaits you. Our partner Pavle cares perfectly for you – all around the clock.

Austria

For the Whole Family

Climbing from the flat country to hunt in the mountains is not the only aspect of hunting in Austria that holds a special thrill. To be able to spend the whole day stalking chamois in the spectacular Alpine scenery is a thoroughly enjoyable change for most hunters, who can only hunt in this type of terrain in the twilight hours at home, if at all. What's more, there are few places outside the beautiful Austrian Alps where you can combine hunting with a family holiday with just a few hours' driving.

Whether you choose to start your hunt from a cosy guesthouse, a holiday apartment or a stylish hunting lodge, you will always be impressed by Austrian hospitality and the knowledge and experience of your hunting guide.

Feathered Game Hunting Worldwide

A large variety of species and beautiful countrysides make our feathered game hunting destinations all over the world an unforgettable experience. Feel well taken care of: Our partners know the best hunting areas and the optimal hunting season. Look forward to country-specific hospitality and the exchange of experiences with other hunters in the relaxed atmosphere of our comfortable accommodations.

Feathered game hunting destinations
**Argentina, Finland, Hungary,
Ireland, Iceland, Scotland, Spain,
South Africa**

Please note that there is also a good choice of activities and exciting sights for non-hunting companions in most countries.

Your Individual Trip – Anything is Possible

Do you have another destination in mind for your hunting trip? Simply contact us. We have many other fantastic hunting destinations in our portfolio.

Our experienced team of travel experts can advise you and help you to design your adventure exactly as you want it. With our all-inclusive package, we take care of all aspects of travel planning including booking flights and transfers.

Our extensive contacts include forestry organisations, accommodation providers and hunting outfitters, so we can design your trip to suit your needs and hunting wishes. As a premium hunting trip provider, we place a lot of value on the highest quality and complete customer satisfaction in everything we do. To book your trip, please contact us. We can provide you with current information and quotes, plus advise you in detail about all the travel and hunting-related matters.

YOUR HUNTING EXPERIENCE. YOUR HUNTING GEAR.

DEVELOPED BY HUNTERS FOR HUNTERS

Your passion is hunting in mountainous terrain. You want to face this challenge in every weather situation. Exhausting, sweaty ascents in severe weather conditions, towards the tree line. Climbing through rubble fields, observing and chase the game through mountain pastures, using every rock and bush to hide. Coming closer by crawling through moistness and dirt. Whenever you have to rely on your gear – you only can rely on the best.

HUNtec

HUNTEC CLOTHING SYSTEM

HIGH-PERFORMANCE HUNTING – REVOLUTIONARY FABRICS

DEFINED FOR

- hunting in mountains and rough terrain
- during physical exertion and resting periods – rapid temperature fluctuations

THE REQUIREMENTS FOR SUCH A CLOTHING SYSTEM ARE:

- Lightweight, flexible and spacious clothing based on the principle of different layers
- Fast drying – moisture transporting materials are the main focus
- Wind, weather and cold protecting clothing, against rapid changing weather conditions

The breathability of the clothing has higher priority over the noiselessness of the materials used, anything else would impair the flexibility of the material.

SHELL

100% weather protection and maximum freedom of motion.

INSULATOR

Perfect balance of heat retention and breathability. The sovereign all-rounder for all weather conditions.

MIDLAYER

Essential as an individually worn jacket and perfect as a breathable, fast drying layer under a insulation jacket.

BASE

Perfect on the skin, functional and comfortable drying very fast.

OUTERWEAR

Maximum freedom of motion and weather resistant make these trousers to one of the best hunting trousers on the market.

Blaser

We would like to thank all our hunters for taking part in the photo shoots.

Subject to technical changes, errors and color variations.
Models can vary from country to country.

Blaser hunting rifles, ammunition and silencers are distributed exclusively through authorized Blaser dealers and are sold only to legal permit holders.

Please understand the legal regulations for the usage of silencers and thermal clip-on devices in your area and note that not every country allows their use.
