# YOUR HUNTING EXPERIENCE. YOUR HUNTING GEAR.

DEVELOPED BY HUNTERS FOR HUNTERS

Your passion is hunting in mountainous terrain. You want to face this challenge in every weather situation. Exhausting, sweaty ascents in severe weather conditions, towards the tree line. Climbing through rubble fields, observing and chase the game through mountain pastures, using every rock and bush to hide. Coming closer by crawling through moistness and dirt. Whenever you have to rely on your gear – you only can rely on the best.

## SECOND TO NONE

We believe the iconic Blaser R8 is the best hunting rifle in the world. It was only natural for us to use it as the blueprint and benchmark for the design of the new Blaser HunTec line. Like the R8, the HunTec line captivates with a completely new hunting concept through uncompromising characteristics such as: modularity, versatility, precision and efficiency. When it matters most, you can rely on HunTec.

MODULAR  
VERSATILE  
PRECISE  
HIGHLY EFFECTIVE

  
**HUNTEC**  
ALPINE PERFORMANCE

## 1. ASCENT

### YOUR MOUNTAIN

The day breaks in untouched nature. You know the expectations ahead of you. You know the ascent is going to be tough. You like the pain, the effort required in rough terrain, the sweat on your skin. You know your destination. You strongly head off on your path.

### YOUR ASSURANCE

You know what you can rely on. Now, where it's all uphill, you need everything that the new Blaser HunTec collection has to offer. A midlayer that quickly transports the sweat from your skin. A shell jacket that protects you from changing conditions and temperature drops. Breathable and extremely fast drying.

## 2. STALKING

### YOUR HUNT

Made it. You quickly take your bearings and then find the right position for your first observation. Waiting, moving into a better position. The tension increases as you realize the right moment is nearing. At the same time, you are comfortable and feel ready with your R8 in steady hands as your breathing slows and your pulse races.

### YOUR VERSATILITY

Now you require the flexibility of the HunTec Collection. It has to provide you warmth while observing. Regardless how long this task will take.

All of a sudden you have to move fast, in order to obtain the necessary distance between you and your game.

The last meters demand everything from you — using rocks and bushes as cover to find the perfect shooting position.

Again, your clothing's breathability and freedom of motion are paramount to place an accurate and clean shot.

# THE HUNTER'S JOURNEY

## 3. DESCENT

### YOUR PREY

This is the moment that made all the effort worthwhile. Hunting fever and adrenaline subside into humbleness and gratification. Happy and proud and at one with nature, you start the descent. Down to the valley with your trophy.

### YOUR SAFETY

The prey is heavy on your back. Yet the thought-out, breathable carrying system of your Blaser rucksack provides optimum weight distribution and safely accommodates both your R8 and the prey. Your clothing on the descent adapts to the quick climate changes. An inconceivable precision of microclimate reliably accompanied you during your hunt – thanks to the new Blaser HunTec collection!

It's up to you how far you wish to go. It's up to us to support and accompany you in all weather conditions – and in any terrain. HunTec contains all of our technical garment expertise and the innovative design from our developers. Designed to power your performance, to serve one objective – your successful hunt.

# THE BLASER HunTec SYSTEM

Choose the best! Everything is there for you. For us, the R8 is the best rifle in the world and combines perfectly with the Blaser rifle scope. The high performance of the Blaser HunTec collection and Blaser accessories provide a complete high performance lineup.

## RIFLE OPTIC CLOTHING ACCESSORIES

# HUNTEC CLOTHING SYSTEM

## ALPINE HIGH PERFORMANCE

### DEFINED FOR

- Hunting in mountains & rough terrain
- During physical exertion and resting periods – rapid temperature fluctuations

### THE REQUIREMENTS FOR SUCH A CLOTHING SYSTEM ARE:

- Lightweight, flexible and spacious clothing based on the principle of different layers
- Fast drying – moisture transporting materials are the main focus
- Wind, weather and cold protecting clothing, against rapid changing weather conditions

The breathability of the clothing has higher priority over the noiselessness of the materials used, anything else would impair the flexibility of the material.

# LAYER SYSTEM

## SHELL

100% weather protection in alpine terrain whilst still offering freedom of motion.

## INSULATOR

Perfect balance of heat retention and breathability. The sovereign all-rounder for all weather conditions.

## MIDLAYER

Essential as an individually worn jacket and perfect as a breathable, fast drying layer under a insulation jacket.

## BASE

Perfect on the skin, functional and comfortable drying very fast.

## OUTERWEAR

Maximum freedom of motion and weather resistant make these trousers to one of the best hunting trousers on the market.

### OUTERWEAR

Charger Pants | Resolution Pants |  
AirFlow Pants | AirFlow Shorts

### BASE

TF Shirt 20 | TT Shirt 20 | AirFlow Shirt | Functional Shirt | Functional T-Shirt

### MIDLAYER

Flash Midlayer Jacket | Drain Midlayer Halfzip

### INSULATOR

Observer Down Jacket | Supervisor Down Jacket | Operator Jacket | Alpha Stretch Jacket

### SHELL

Venture 3L Jacket | Venture 3L Pants | Tranquility Jacket

# WHY HUNTEC?

## PRECISION THERMO REGULATION (PTR-SYSTEM)

- PTR is a insulation system that provides a precise balance of heat retention vs. breathability for all stages of the hunt and for all conditions.
- Advanced materials, finishings and insulation technologies are combined to perfectly balance heat retention and breathability for different warmth preferences.

**PTR-SYSTEM**  
BY BLASER

## ENGINEERED FREEDOM OF MOTION

- Garment seam construction is designed around the hunter's motion radius.
- Integration of 4-way and 2-way stretch fabrics.
- Stretch layering is done from the inside out. For example in the insulation jackets the stretch direction is matched on the lining, insulation and shell fabric.

## LIGHTWEIGHT

Materials where selected based on the best possible ratios in terms of

- Weight to Durability
- Weight to Stretchability
- Weight to Quietness
- Weight to Packability

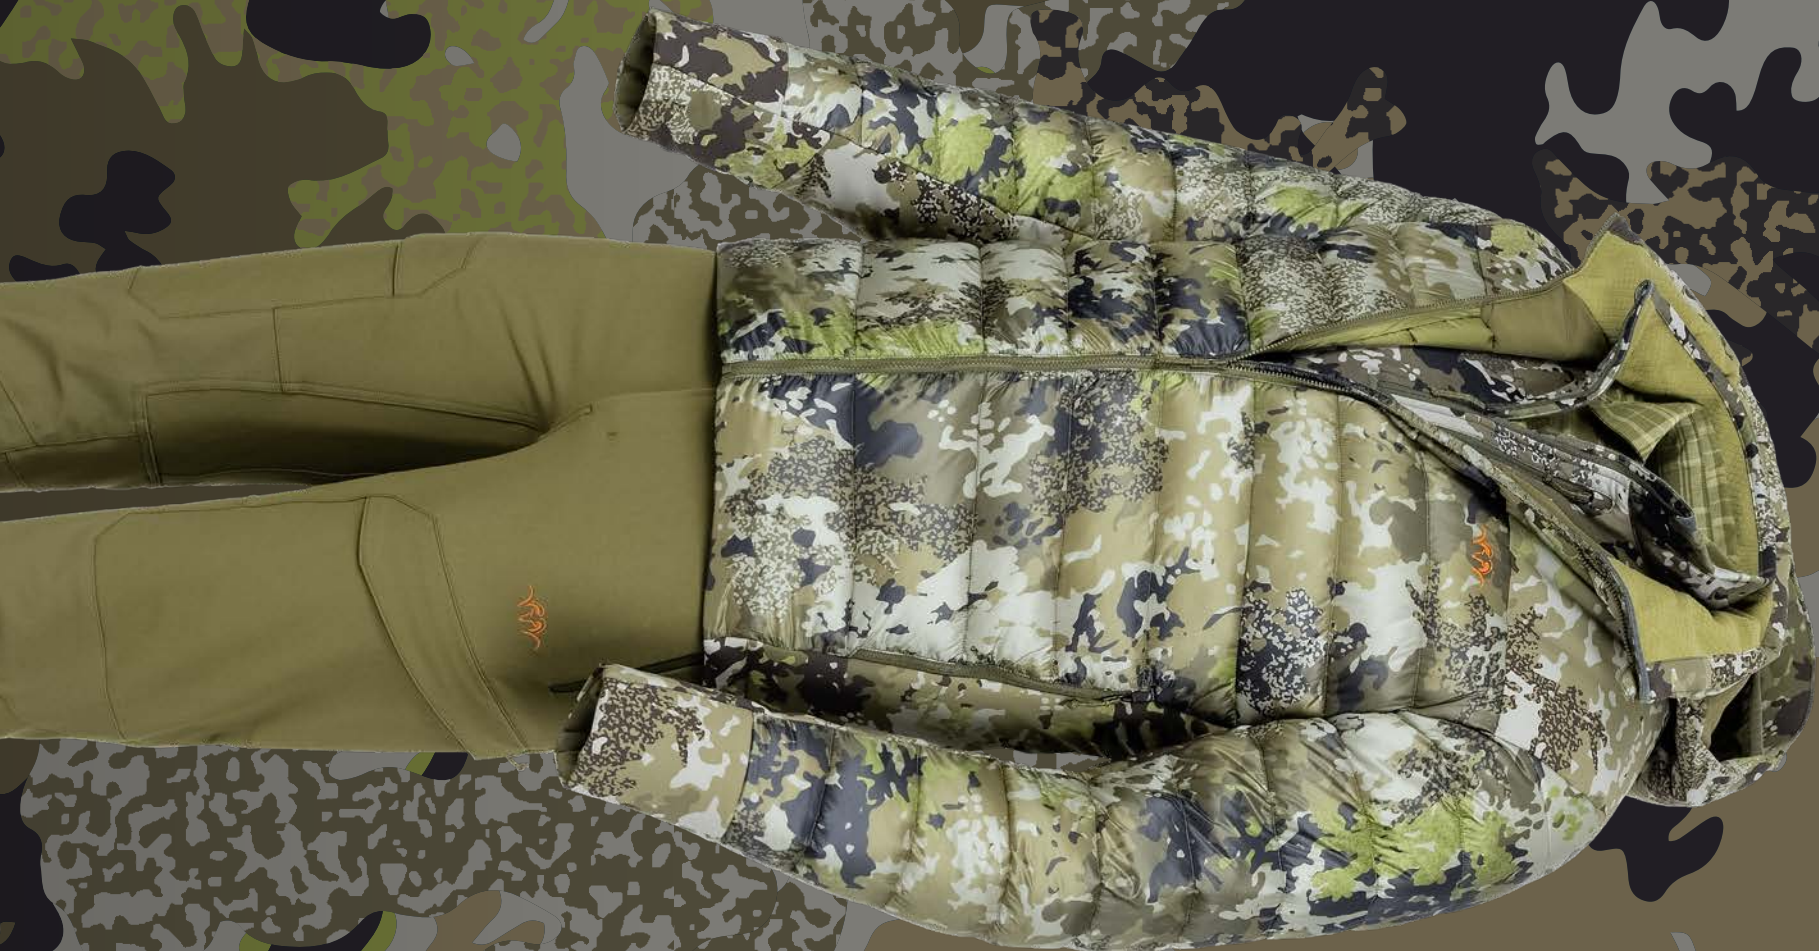

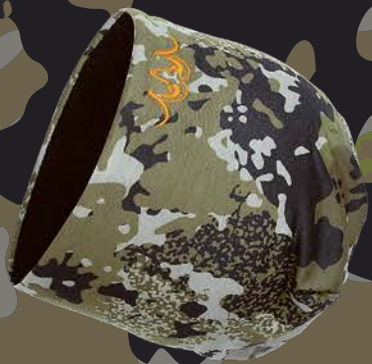

The line is designed for a hunter that wants a minimal amount of weight and wants to move fast through alpine terrain.

MODULAR

# PRECISION THERMAL REGULATION = PTR

PTR is an insulation system that is designed with different levels of heat retention for breathability levels. Each level overlaps the previous, in order to provide maximum comfort no matter what conditions you are in.

- PTR uses a mix of windproof and air permeable fabrics combined with different levels of insulation to insure warmth and at the same time avoid an excess build up of moisture.
- The Observer, Supervisor and Operator Jackets can be layered under the 3L Jacket or worn by themselves.

**PTR-SYSTEM**  
BY BLASER

A man in camouflage gear is shown in a crouched position, adjusting a black glove on his left hand. He is wearing a matching camouflage hood and a cap. The background is a blurred, natural outdoor setting. The entire image has a dark, semi-transparent overlay.

# FREEDOM OF MOTION

## STRETCH DIRECTION OF FABRIC

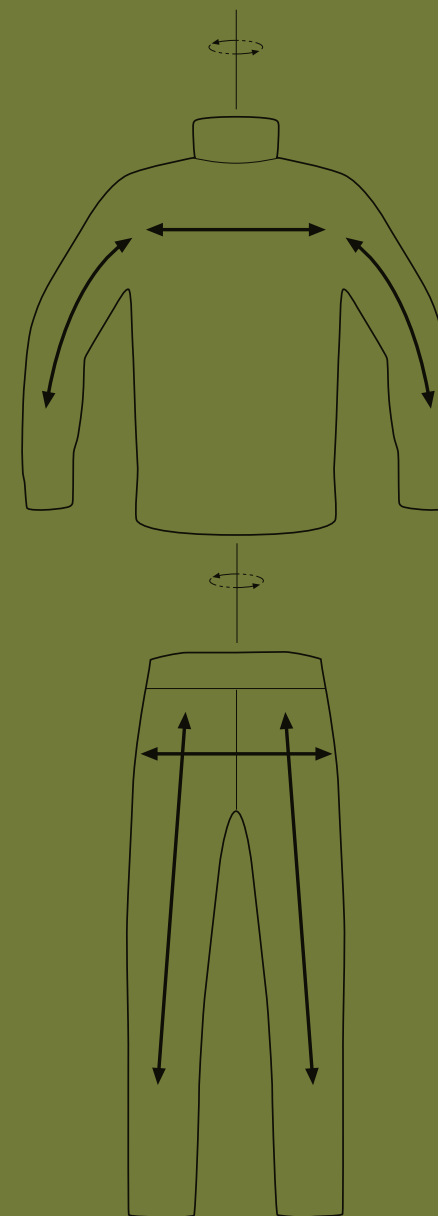

### ENGINEERED FREEDOM OF MOTION

Garment seam construction is designed around the hunter's motion radius.

Integration of 4-way and 2-way stretch fabrics.

Stretch layering is done from the inside out. For example the stretch direction in the insulation jackets is matched on the lining, insulation and shell fabric.

# SOLID

NATURE AT ITS FINEST

The tactful colors of the Solid collection are based on natural tones that you would see on the tree lines. Thyme mélange, dark olive and highland green offer a harmonious balance of hunter and surroundings. In particular, the highland green which blends in brilliantly with the alpine terrain.

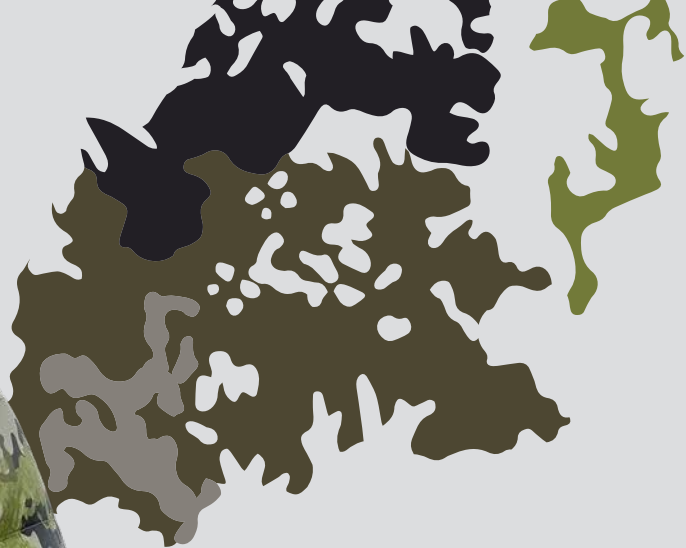

Thyme mélange 537

Dark olive 566

Highland green 568

Olive / beige checked 524

# CAMO

## CAMOUFLAGE WITH A SYSTEM

For successful mountain hunting above the tree line where the terrain is steep cliffs, stone and rock, the correct camouflage is essential. Blaser HunTec devotes itself to mountain hunting with second to none comparison with a complete set up: Blaser R8, Blaser scope, Blaser hunting clothing and Blaser accessories – all of which are offered in an exclusive matching Camo look. Developed from hunters, for hunters – for successful hunting in mountain terrain.

# HUNTEC CAMO

DESIGN MEETS TECHNOLOGY

## ALPINE PERFORMANCE

To guarantee the best performance in alpine terrain – this was the goal when developing the Blaser HunTec collection. Countless information was processed, tests performed under varied light and weather conditions in various terrains to ensure a camo clothing line that will live up to its name.

The Men's Alpha Stretch Jacket extends the comfort zone of the Hunttec PRS system. It accommodates milder more transition seasonal conditions as well as higher activity levels. The face fabric is wind resistant, water repelling, lightweight and stretchable. The insulation is made from POLARTEC® Alpha® meaning it has a high level of stretch and due to its non-migration character the inside lining is very air permeable. The combination provides superior moisture management for an insulation jacket.

FEATURES

Insulation Jacket | Lightweight weather resistant outside fabric | High permeable inside fabric | One chest pocket | Two hand warmer and backpack accessible pockets | Elastic insert in the lower arm for snugger fit | Chin protection over front zip

## FABRIC TECHNOLOGY

POLARTEC® ALPHA® ACTIVE INSULATION CONTINUOUSLY RELEASES EXCESS BODY HEAT BEFORE IT BUILDS TO CAUSE SATURATION AND DISCOMFORT.

This patented, adaptive knit quality is made possible through Alpha's lofted fibers connected to a solid mesh core. And since Polartec® Alpha® design is inherently hydrophobic, it resists all moisture and dries incredibly fast.

### FEATURES + BENEFITS:

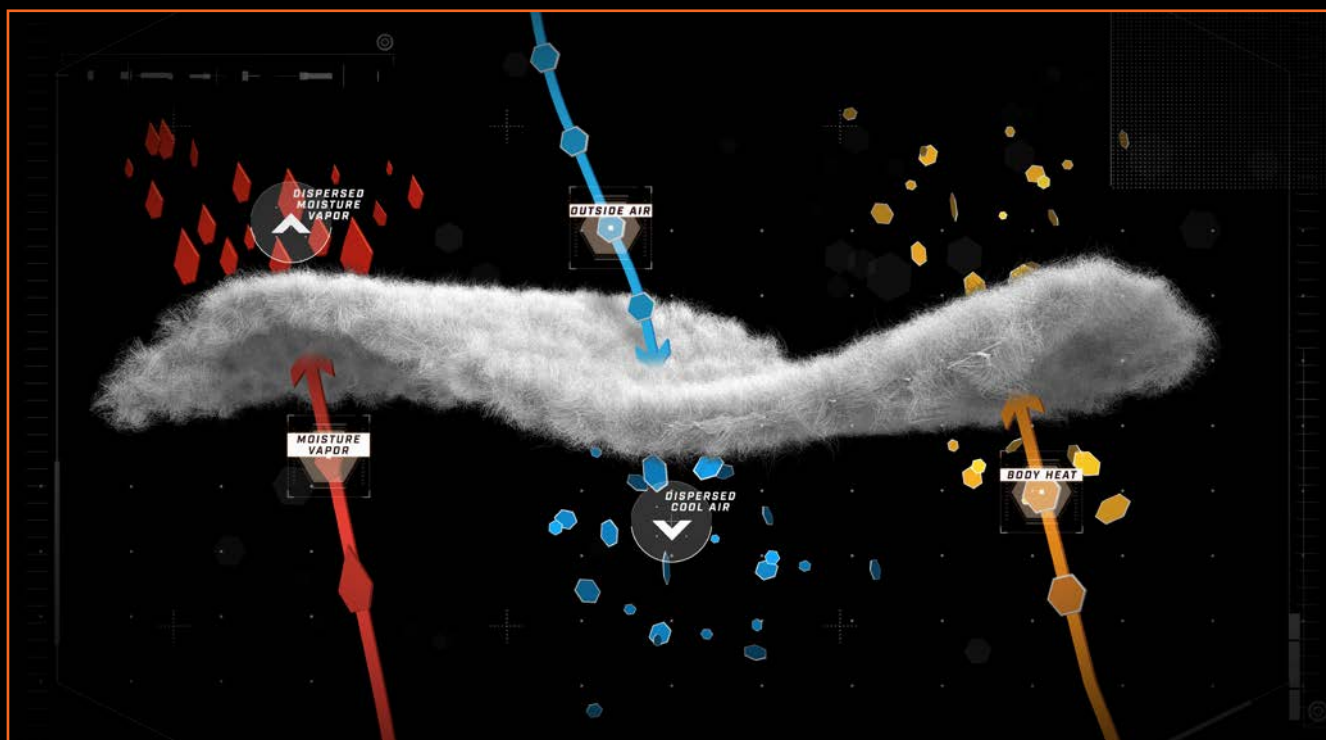

- | REGULATES WARMTH
- | ADVANCED BREATHABILITY
- | FAST DRYING
- | COMPRESSIBLE
- | LIGHTWEIGHT
- | HIGHLY DURABLE

## ACTIVE INSULATION

REGULATE COMFORT IN CHANGING CONDITIONS.

Polartec® Alpha® is the original active insulation, invented to offer both superior breathability and dependable warmth during start-stop activities. Resilient lofted fibers connected to a durable mesh core provide versatile performance in all conditions and environments.
