**STRASSER**  
PASSIONATE INNOVATION

# ONE ACTION MILLION OPTIONS

## RS 700

At STRASSER, „Passionate Innovation“ is more than just a company slogan. Passionate Innovation is our ethos, guiding principle, and represents the unrelenting spirit of each STRASSER employee. That ethos is the very reason why we are always challenging ourselves to push the envelope in product development and to even discover new advancements for legacy products that most have accepted as „good enough“.

More than 60 years ago, Mike Walker designed the first Remington™ 700. Since its inception in 1962, the Remington™ 700 has grown to be one of the most profilitec and broadly manufactured bolt-action rifles and actions produced in the world. Combine STRASSER's „Passionate Innovation“ to the Remington™ 700 design and the result is the world's first STRASSER 700 straight-pull-action, the RS 700.

Choose your *RS 700* barreled action:

#### RS700 Action Features:
